Lot 74. Audemars Piguet — Royal Oak

Experience the fusion of horological craftsmanship and exquisite design with the Royal Oak Frosted White Gold Chronograph. This limited edition Audemars Piguet shows innovative spirit combining high-end fine jewellery with the precision of fine watch making, powered by Calibre 4401, an automatic chronograph movement with approximately 70 hours of power reserve. The case and bracelet are crafted in 18 carat white gold and features the signature Frosted Gold finish, achieved using the Florentine “hammered” technique, which imparts a shimmering, jewellike texture.

Welcome to Important Watches — this autumn's main event for all watch enthusiasts

It's with great pride that we present the catalogue for Important Watches autumn 2025. As usual there's a wide range from old to new, sporty to dressy and classic to rare. A handpicked selection of watches we believe should excite both the most experienced collectors as newer enthusiasts.

Vintage chronographs is always a segment that attracts many collectors, and we believe we have a great assortment to offer. A few worth mentioning is the two Minervas (Lots 7 and 53), the Omega Seamaster in 18K gold (Lot 93), and of course the Lemania, so called "Viggen" presented as Lot 118. Or if you are more into the neo-vintage section, we have a couple of special Breitlings, like Lot 76, a Cosmonaute "Scott Carpenter Mercury 7", Lot 79, a Navitimer "Top Gun" or Lot 85, the classic Chronomat "P.A.N. Freccie Tricolori".

One of the most popular brands at the moment is of course Cartier. When smaller and dressier watches have gained interest in the market, these classic and sophisticated timepieces are more popular than ever. Some of the highlights from the auction is Lot 5, a Baignoire in white gold with diamonds, a couple of manual gold

Tanks from the 1980's and Lots 89 and 120 – a Tank Louis and Panthère with rare bracelets.

One real showstopper that also cannot go unmentioned is Lot 74, an Audemars Piguet Royal Oak in "frosted" white gold. A heavy, head-turning piece that needs to be experienced. Make sure you don't miss it at the viewing.

Rolex is usually well presented at these auctions, and this time is no different. Some stand out pieces are Lot 2, the 18K gold Daytona with so called "Floating Dial", Lot 42 a so called "James Bond" Submariner Ref. 5508 and Lot 55, a beautiful and classic Oyster Perpetual from 1968. Within the ladies' section we can also mention two spectacular Datejusts, Lot 16 in 18K gold with diamonds on the lugs, and Lot 63, a two-tone version with a stunning Aventurine dial.

We hope you will all find this catalogue as varied and interesting as we do and would like to wish both sellers and buyers an exciting Saturday!

Kaplans through,

Georgios Batselas

Christian Blomberg

Michael Norberg

Sanna Gränesjö

Tomas Keränen

Daniel Staaf

Buyer's Guide

All items at the auction are sold as seen. The buyer is therefore advised to carefully examine the condition of the lots before the auction. If Kaplans has made a serious error of judgement, stated any incorrect information, or if a so-called hidden defect exists, this may constitute a basis for cancelling the purchase. Complaints must be made within 10 days after the auction.

Our hammer auctions are physical auctions that are held at our premises at Biblioteksgatan 5 in Stockholm. You can bid online or bid in our auction room during these auctions. You may also submit absentee bids.

Absentee bids

You may submit absentee bids for any item via Customer Services or our website until the time an auction starts. You indicate your maximum bid, which is the maximum amount you are willing to pay for a given lot. Customer Service then automatically bid on your behalf for this amount.

Bid online

You can bid online during the auction. Simply log in with your customer number or registered email address and password. You submit your bid by clicking on the "Place bid" button. Your bid is made immediately and in accordance with our bidding intervals. All bids made at our auctions are binding. Kaplans Auktioner cannot guarantee that all bids are received at auction.

Bidding in our auction hall

To bid in our auction hall during a hammer auction, you need an auction paddle that you obtain from Customer Services either prior to or during an auction. Your bid is binding until another bidder makes a higher bid. The buyer is the bidder who makes the last and highest bid when the auction hammer falls.

If two bidders make a bid of the same value, it is the auctioneer who determines which bid applies. The auctioneer also determines whether bidding should resume due to uncertainty surrounding the last bid.

Estimate prices are also quoted in Euro, where the exchange rate € 1 = SEK 11.00 is used in this catalogue. Amounts are rounded off up or down to the nearest ten. However, the final purchase price is set using the official exchange rate of the day of the auction. Purchased lots shall be paid in Swedish kronor. Purchased lots must be picked up and paid for within 5 business days from the auction date.

Bidding increments

Bidding starts at the lowest bid and then follow these increments:

Increments SEK	Increase SEK
SEK 500	SEK 25
SEK 500 – 1 000	SEK 50
SEK 1 000 – 10 000	SEK 100
SEK 10 000 – 20 000	SEK 200
SEK 20 000 – 40 000	SEK 500
SEK 40 000 – 80 000	SEK 1 000
SEK 80 000 – 150 000	SEK 2 000
SEK 150 000 – 300 000	SEK 5 000
SEK 300 000 – 1 000 000	SEK 10 000
Above SEK 1 000 000	SEK 20 000

Bids are accepted within the bidding increments, however the auctioneer may deviate from these intervals.

Buyer's premium

Kaplans Auktioner charges a buyer's premium of 20% on hammer prices up to SEK 1 000 000, VAT included. Value added tax is calculated only on Kaplans' sales commission and not on the hammer price. For each item purchased at auction we also charge a hammer fee of SEK 50 including VAT.

Buyer's premium levels

If the hammer price exceeds SEK 1 000 000, we use the following levels: Hammer price up to SEK 1 000 000: 20% premium. Hammer price between SEK 1 000 000 and SEK 5 000 000: 10% premium. Hammer price above SEK 5 000 000: 5 % on the exceeding part.

Bidding example:

You have placed a winning bid of SEK 5 500 000 on an item.

Premium:

1 000 000 * 20 % = SEK 200 000

4 000 000 * 10 % = SEK 400 000

500 000 * 5 % = SEK 25 000

Total buyer's premium = SEK 625 000.

The hammer fee is SEK 50.

Total amount: SEK 6 125 050.

Important Watches – at Kaplans Auktioner

Selection

The idea of Important Watches is to create an auction which consists primarily of collectibles.

These watches may sometimes have a rather modest price, but somehow appeal to us because they are rare, unique and sometimes in mint condition. Some items may be restoration objects but can still be considered collectibles. We usually offer a couple of newer watches as well, in which case the watches are of more unusual models, with the associated certificate accompanied.

Boxes and certificates are available only when it is stated in the catalogue text.

All watches are sold as seen, both at the auction and in the store. All assessments of damage are subjective, as made by our experts. Buyers should carefully make their own assessment of the object.

The watches sold by Kaplans Auktioner are to be considered as art objects. This means that Kaplans Auktioner cannot guarantee the buyer that the watches work perfectly as timepieces.

Leather straps, gaskets and plastic crystals are considered service parts and may often be necessary to replace.

Definitions, measurements and grading

“Not working” means that an overhaul of the watch at a watchmaker is necessary. It may concern a new battery, cleaning, new oil, and/or a repair.

“Defect” means that the watch is completely or partially damaged, and thus in a need of repair. It may also need new parts to get in good working condition.

Measurements described in the catalogue indicate the case's outer dimensions, excluding crown and eventual push buttons.

All items are described with a grading system on a scale from one to ten, where ten is considered to be perfect. The categories that are graded are; movement (M), dial (D), case (C), bracelet (B). The expert's opinion (EO) is our rating of the watch.

Example from a description of a watch: M 9, D 10, C 8, B 9, EO 9

We recommend

When buying at an auction, you should expect some service or repair to be needed to get the watch in good condition. In some cases, such a repair and service may be costly. Please ask us before the auction.

Some watches need a battery replacement and all watches need new gaskets or a cleaning periodically.

We recommend an overhaul of the watch at a watchmaker's at least every fifth to sixth years. For a watch to be waterproof, one should test it every one to two years.

For questions, contact us and we will do our best to help you.

Lot 6, 73. Rolex — Day-Date

Tips and advice concerning your watch

Kaplans guarantees the authenticity of the watch and the accuracy of the cataloguing of the item you have purchased. All watches are sold as seen and therefore Kaplans is not responsible for the time accuracy of the watches. It is impossible to know where the current watch is in the service interval. If service documentation is not included you should expect the watch to be in need of an overhaul shortly.

Service

All watches do have maintenance needs, and you should regularly submit your watch to a watchmaker for overhaul. The overhaul includes cleaning, oil change, new gaskets, etc.

Please note that watchmakers will perform an overhaul in different ways. It may sometimes be difficult to compare prices. We recommend you to always ask for a quote when you submit your watch. This way you know in advance what is to be done, at what cost, and an estimated delivery time. A watch should get an overhaul at an interval of five to six years.

Time Deviation

The quartz movement is generally resistant to shock and has a good precision. With a quartz movement you can expect a deviation of plus/minus maximum 10 seconds/month.

A mechanical watch (manual or automatic) has more parts and is therefore more sensitive to shocks. It is also influenced by temperature changes and movements, why you need to have a greater tolerance for differences in precision. With a mechanical watch you should expect a deviation of up to plus/minus 3–4 minutes/month.

Waterproof

The waterproofing ability of a watch is expressed in the following instructions, often indicated on the watch dial:

30 m / 3 ATM / 3 bar

50 m / 5 ATM / 5 bar

100 m / 10 ATM / 10 bar

150 m / 15 ATM / 15 bar

200 m / 20 ATM / 20 bar

A watch is considered to be water resistant if it is marked 30 m. In practice, water resistant means that you may use it as an everyday watch, washing hands, washing dishes and wear it in slight rain.

If you want to be able to shower and swim with your watch, it must be resistant to at least 100 m.

To withstand diving and the stress this causes due to large pressure changes, the watch should at least be resistant to 200 m.

Note that the gaskets are to be seen as service parts and the watch must be maintained to retain its density. Kaplans recommends that you submit your watch to a watchmaker who works with the specific brand, to replace the gaskets and get the watch pressure tested every one to two years, or before a vacation by the seaside.

Dial

All the objects are described with a grading system, including five categories that assess the condition from one to ten, where ten is considered to be perfect. One of the categories that are considered is the dial.

The damages assessed for a dial may for example include discoloration, moisture damage or some other kind of damage. It is rarely, if ever, that a damaged dial affects the function of the watch. This is a damage of a more cosmetic character.

Leather Strap

We recommend our customers to buy a new leather strap, because the included strap on a used watch is often worn out. To take care of your newly purchased strap, wipe the band with a slightly damp, soft cloth after use.

Bracelet

You can clean your watch bracelet yourself using a soft cloth or brush, soap and lukewarm water. However, it is very important to know that the watch is waterproof and has been tested recently so that it doesn't get damaged by moisture during the cleaning. In case of doubt, do not rinse the watch under water.

Valuation certificate

We are happy to provide a written valuation certificate. Kaplans Auktioner's valuation certificates are recognized by all insurance companies and several of the appraisers who work at Kaplans Auktioner's Watch Department are "of the Swedish Chambers of Commerce appointed appraiser."

In addition to a picture and a clear cataloguing, your watch valuation certificate also contains a current market value. As this value for various reasons may change over time, it is important to renew your valuation certificate regularly. We, and most insurance companies, recommend that you do this after two, maximum three years, or if something remarkable happens to the watch.

Lot 2. Rolex — Daytona

Introduced in 1988, the Rolex Daytona ref. 16528 was the first automatic gold Daytona powered by the Zenith-based Caliber 4030. Early examples are known for their rare “Floating Cosmograph” dial, a 200 units per hour bezel with the scale positioned at 3 o’clock like on the earlier manual-wind models before Rolex moved it to 12 o’clock shortly after, and a transitional short clasp with an early coronet engraving without the “Oysterlock”. These details define the very first generation of the modern Daytona.

Lot 34. Omega — Railmaster

Omega Railmaster CK2914 was launched in 1957 as part of Omega's iconic "Professional Trilogy," alongside the Speedmaster and Seamaster 300. The model was specifically designed for professionals such as engineers, technicians, and railway workers who often operated in environments with strong magnetic fields. The Railmaster stood out for its anti-magnetic construction, featuring a movement protected by a metal inner case capable of withstanding up to 1000 Gauss.

Lot 36. Vacheron & Constantin — “TV dial”

Vacheron & Constantin is one of the oldest watch manufacturers, celebrating their 270th anniversary this year. To celebrate, they released the most complicated wristwatch ever made, featuring 41 different complications and made by 1521 components.

Lot 36 on the other hand is the opposite. A retro and elegant time-only watch in 18K gold with a so called “TV-dial”. A TV-dial watch mimics the shape of a classic television and usually has slightly curved corners. A design language that is just as trendy today as it was modern for its time.

Lot 39. Patek Philippe — Calatrava Weekly Calendar

Although Patek Philippe is famous for their long line of different calendar complication watches, the reference 5212A stands out, both in aesthetics and functionality. At first glance you immediately notice what looks like handwritten font for the letters and numbers in black against the off-white dial. Don't mistake "handwritten" for hard to read though, the time is easily viewed using Dauphine style hands and Obus style hour markers, while the much slimmer pointer style hands with red accents marks the calendar (day, week and month).

The inclusion of week presentation in calendar watches is uncommon in the watch world, as is the use of steel in a Calatrava collection watch. Overall, we are presented with a watch design that works well worn with a suit and tie or with more relaxed casual wear, and easy to mix and match with different strap styles and colours.

Lot 42. Rolex — Submariner, “James Bond”

Introduced in the mid-1950s, the Rolex Submariner ref. 5508 is closely associated with the early James Bond era and represents the final version of the Submariner without crown guards. The watch combines a refined 37 mm case with a black bezel lacking full minute graduations and the elegant “Chapter Gilt Dial”, distinguished by its gilt printing and radium lume. Powered by the automatic Caliber 1530, the 5508 captures a defining moment in Rolex history, bridging the pure, understated design of the first Submariners with the more robust professional models that followed.

Lot 58. Breitling — Navitimer QP 48

QP is short for Quantième Perpétuel, which is French for perpetual calendar. A perpetual calendar is a very complex complication that tracks day, date, month, year and even leap-years. The first ever known was invented by Thomas Mudge in 1762 and was built in a pocket watch.

The Breitling Navitimer QP 48 was first shown at the Basel fair in 2014 and was made with two different dial variations, black and bronze, and both versions were limited to 25 pieces.

Lot 63. Rolex — Datejust, Aventurine Dial

Throughout their history, Rolex have released a variety of stone dials, combining technical precision with natural artistry. Materials such as Onyx, Lapis lazuli, Malachite, Tiger's eye, and Aventurine have given each watch a distinctive character. The Aventurine dial is especially admired for its deep, glassy surface that sparkles with tiny mineral inclusions, reminiscent of a starlit sky. Each piece is unique, reflecting Rolex's craftsmanship and its pursuit of timeless design.

Lot 85. Breitling — Chronomat “Frecce Tricolori”

Breitling entered an agreement with Frecce Tricolori, the aerobatic demonstration team of the Italian Air Force, in 1983. The team, which was founded in 1961, is one of the world's most famous aerobatic teams and use red, white and green smoke to imitate the Italian tricolor.

Breitling developed the new model Chronomat for them, which later in 1984 became a part of the standard Breitling catalogue.

Chronomat A13050.1 is the second generation of collaborations between Breitling and Frecce Tricolori, until today's date seven different versions have been made.

Lot 89. Cartier — Tank Louis

Designed by Louis Cartier in 1917, the Tank is an icon of modern watchmaking. The first version is called “Normale”, but it’s the later “Tank Louis” that most people associate the name with today and the model has been worn by celebrities like Andy Warhol, Jackie Kennedy and Frank Sinatra. Lot 89 is from 1989 in 18K yellow gold and with a rare hexagon patterned bracelet.

Kaplans Auktioner

Kaplans Auktioner is a family run business in its third generation. Kaplans Auktioner is the leading Swedish auction house for jewellery, silver, precious stones and watches. The auction house is situated on no 5 in the famous shopping street Biblioteksgatan in Stockholm, Sweden.

In addition to the weekly auctions throughout the year, Kaplans Auktioner also offers valuation service, a great selection of unique jewellery and watches in the shop, and also holds an inhouse goldsmith workshop. This gives Kaplans Auktioner a unique ability to offer customers tailor-made solutions at a very competitive price.

With more than 100,000 items for sale each year, Kaplans Auktioner reaches a large audience of buyers and sellers, both in Sweden and in the Nordic countries, as well as in the rest of the world.
