Lot 3. F.P. Journe — Chronomètre Bleu

It is really impressive that F.P. Journe has become one of the most known and respected independent watch manufactures today, after only 22 years in the business. This is the work of the founder and owner with the same name, designing the dial first and next the 18K solid gold movement, combining form and then function, which is a big challenge to start with. Everything is made in-house at their facility in Geneva. The company produces only between 700 to 900 watches a year, something that makes every watch even more exclusive and special.

Welcome to Important Watches — Autumn 2021

The world has changed in many ways in the last couple of years. The demand for interesting watches has never been higher and it seems to be a shortage of both new and vintage watches – making the market hotter than ever. That, combined with a carefully chosen selection, made our Important Watches in May 2021 our and the Nordic region's most successful watch auction ever. In total, watches were sold for more than SEK 11 million – a new record.

We are so humble and grateful for the fact that our loyal customers keep coming back year after year, as well as we are thankful and happy for all the new customers and relations we keep building along the way – with the shared passion for watches!

With the outstanding result in the back, we now strive further to both produce and present better and more interesting auctions. Our main goal is to give you the absolute best watches on the market – and we believe so, that this autumn's auction really does.

One of the watches we would like you to take a closer look at is Lot 3, the F.P. Journe Chronomètre Bleu. Its case is made in Tantalum, a metal very rarely seen in watch making since it is so hard and difficult to work with. But on the other hand, appreciated because of its high resistance to wear and corrosion. That combined with the movement made from 18K rose gold and a beautiful blue dial makes this into something truly spectacular.

Lot 18 is another one to watch. An Omega Speedmaster “Apollo XI” from 1969 in 18K gold. This reference was made to celebrate the moon landing and only made in 1014 pieces. The one for sale is number 647 and was originally delivered to Germany.

As usual Rolex are well-represented and it's hard to pick favourites from this selection. Of the sport ones, some great examples are Lot 14, a Submariner Ref. 5513 with s.c. “Serif Dial”, Lot 25, a Daytona with Zenith-movement and Lot 70, a Sea-Dweller Ref. 16660 with a very charming “Spider Dial”. Two other watches that should be catching everybody's attention are Lot 30 and 98. Lot 30 is a 26 mm Datejust with a total of 496 diamonds and Lot 98, a platinum Day-Date with meteorite dial and diamond bezel. You cannot miss them.

All 98 watches are as usual handpicked by us, and it is with great pride we welcome you all to this exciting auction.

Kaplans Auktioner through,

Georgios Batselas

Christian Blomberg

Michael Norberg

Sanna Gränesjö

Tomas Keränen

Buyer's Guide

All items at the auction are sold as seen. The buyer is therefore advised to carefully examine the condition of the lots before the auction. If Kaplans has made a serious error of judgement, stated any incorrect information, or if a so-called hidden defect exists, this may constitute a basis for cancelling the purchase. Complaints must be made within 10 days after the auction.

Our hammer auctions are physical auctions that are held at our premises at Biblioteksgatan 5 in Stockholm. You can bid online or bid in our auction room during these auctions. You may also submit absentee bids.

Absentee bids

You may submit absentee bids for any item via Customer Services or our website until the time an auction starts. You indicate your maximum bid, which is the maximum amount you are willing to pay for a given lot. Customer Service then automatically bid on your behalf for this amount.

Bid online

You can bid online during the auction. Simply log in with your customer number or registered email address and password. You submit your bid by clicking on the "Place bid" button. Your bid is made immediately and in accordance with our bidding intervals. All bids made at our auctions are binding. Kaplans Auktioner cannot guarantee that all bids are received at auction.

Bidding in our auction hall

To bid in our auction hall during a hammer auction, you need an auction paddle that you obtain from Customer Services either prior to or during an auction. Your bid is binding until another bidder makes a higher bid. The buyer is the bidder who makes the last and highest bid when the auction hammer falls.

If two bidders make a bid of the same value, it is the auctioneer who determines which bid applies. The auctioneer also determines whether bidding should resume due to uncertainty surrounding the last bid.

Estimate prices are also quoted in Euro, where the exchange rate € 1 = SEK 10,00 is used in this catalogue. Amounts are rounded off up or down to the nearest ten. However, the final purchase price is set using the official exchange rate of the day of the auction. Purchased lots shall be paid in Swedish kronor. Purchased lots must be picked up and paid for within 5 business days from the auction date.

Bidding increments

Bidding starts at the lowest bid and then follow these increments:

| Increments SEK | Increase SEK |
|---------------------|--------------|
| < 500 | 25 |
| 500 – 1 000 | 50 |
| 1 000 – 10 000 | 100 |
| 10 000 – 20 000 | 200 |
| 20 000 – 40 000 | 500 |
| 40 000 – 80 000 | 1 000 |
| 80 000 – 150 000 | 2 000 |
| 150 000 – 300 000 | 5 000 |
| 300 000 – 1 000 000 | 10 000 |
| > 1 000 000 | 20 000 |

Bids are accepted within the bidding increments, however the auctioneer may deviate from these intervals.

Buyer's premium

Kaplans Auktioner charges the buyer a premium of 20 %, VAT included. For each item purchased at auction we also charge a hammer fee of SEK 50 including VAT.

Example

You make the winning bid for an item at SEK 10 000.

The amount you pay is calculated in the following way:
SEK 10 000 + SEK 2 000 + SEK 50 = SEK 12 050.

Buyer's premium levels

If the price exceeds SEK 200 000, we use the following staircase:

Sales price up to SEK 200 000: 20 %

Sales price between SEK 200 000 – 500 000: 10 % on the excess

Sales price above SEK 500 000: 5 % on the excess

Premium example:

You have won an item for SEK 750 000

200 000 x 20 % = SEK 40 000

300 000 x 10 % = SEK 30 000

250 000 x 5 % = SEK 12 500

Total buyer's premium = SEK 82 500

The hammer fee is SEK 50

Total amount: SEK 832 550

Important Watches – at Kaplans Auktioner

Selection

The idea of Important Watches is to create an auction which consists primarily of collectibles.

These watches may sometimes have a rather modest price, but somehow appeal to us because they are rare, unique and sometimes in mint condition. Some items may be restoration objects but can still be considered collectibles. We usually offer a couple of newer watches as well, in which case the watches are of more unusual models, with the associated certificate accompanied.

Boxes and certificates are available only when it is stated in the catalogue text.

All watches are sold as seen, both at the auction and in the store. All assessments of damage are subjective, as made by our experts. Buyers should carefully make their own assessment of the object.

The watches sold by Kaplans Auktioner are to be considered as art objects. This means that Kaplans Auktioner cannot guarantee the buyer that the watches work perfectly as timepieces.

Leather straps, gaskets and plastic crystals are considered service parts and may often be necessary to replace.

Definitions, measurements and grading

“Not working” means that an overhaul of the watch at a watchmaker is necessary. It may concern a new battery, cleaning, new oil, and/or a repair.

“Defect” means that the watch is completely or partially damaged, and thus in a need of repair. It may also need new parts to get in good working condition.

Measurements described in the catalogue indicate the case’s outer dimensions, excluding crown and eventual push buttons.

All items are described with a grading system on a scale from one to ten, where ten is considered to be perfect. The categories that are graded are; movement (M), dial (D), case (C), bracelet (B). The expert’s opinion (EO) is our rating of the watch.

Example from a description of a watch: M 9, D 10, C 8, B 9, EO 9

We recommend

When buying at an auction, you should expect some service or repair to be needed to get the watch in good condition. In some cases, such a repair and service may be costly. Please ask us before the auction.

Some watches need a battery replacement and all watches need new gaskets or a cleaning periodically.

We recommend an overhaul of the watch at a watchmaker’s at least every fifth to sixth years. For a watch to be waterproof, one should test it every one to two years.

For questions, contact us and we will do our best to help you.

Tips and advice concerning your watch

Kaplans guarantees the authenticity of the watch and the accuracy of the cataloguing of the item you have purchased. All watches are sold as seen and therefore Kaplans is not responsible for the time accuracy of the watches. It is impossible to know where the current watch is in the service interval. If service documentation is not included you should expect the watch to be in need of an overhaul shortly.

Service

All watches do have maintenance needs, and you should regularly submit your watch to a watchmaker for overhaul. The overhaul includes cleaning, oil change, new gaskets, etc.

Please note that watchmakers will perform an overhaul in different ways. It may sometimes be difficult to compare prices. We recommend you to always ask for a quote when you submit your watch. This way you know in advance what is to be done, at what cost, and an estimated delivery time.

A watch should get an overhaul at an interval of five to six years.

Time Deviation

The quartz movement is generally resistant to shock and has a good precision. With a quartz movement you can expect a deviation of plus/minus maximum 10 seconds/month.

A mechanical watch (manual or automatic) has more parts and is therefore more sensitive to shocks. It is also influenced by temperature changes and movements, why you need to have a greater tolerance for differences in precision. With a mechanical watch you should expect a deviation of up to plus/minus 3–4 minutes/month.

Waterproof

The waterproofing ability of a watch is expressed in the following instructions, often indicated on the watch dial:

30 m / 3 ATM / 3 bar

50 m / 5 ATM / 5 bar

100 m / 10 ATM / 10 bar

150 m / 15 ATM / 15 bar

200 m / 20 ATM / 20 bar

A watch is considered to be water resistant if it is marked 30 m. In practice, water resistant means that you may use it as an everyday watch, washing hands, washing dishes and wear it in slight rain.

If you want to be able to shower and swim with your watch, it must be resistant to at least 100 m.

To withstand diving and the stress this causes due to large pressure changes, the watch should at least be resistant to 200 m.

Note that the gaskets are to be seen as service parts and the watch must be maintained to retain its density. Kaplans recommends that you submit your watch to a watchmaker who works with the specific brand, to replace the gaskets and get the watch pressure tested every one to two years, or before a vacation by the seaside.

Dial

All the objects are described with a grading system, including five categories that assess the condition from one to ten, where ten is considered to be perfect. One of the categories that are considered is the dial.

The damages assessed for a dial may for example include discoloration, moisture damage or some other kind of damage. It is rarely, if ever, that a damaged dial affects the function of the watch. This is a damage of a more cosmetic character.

Leather Strap

We recommend our customers to buy a new leather strap, because the included strap on a used watch is often worn out. To take care of your newly purchased strap, wipe the band with a slightly damp, soft cloth after use.

Bracelet

You can clean your watch bracelet yourself using a soft cloth or brush, soap and lukewarm water. However, it is very important to know that the watch is waterproof and has been tested recently so that it doesn't get damaged by moisture during the cleaning. In case of doubt, do not rinse the watch under water.

Valuation certificate

We are happy to provide a written valuation certificate. Kaplans Auktionser's valuation certificates are recognized by all insurance companies and several of the appraisers who work at Kaplans Auktionser's Watch Department are "of the Swedish Chambers of Commerce appointed appraiser."

In addition to a picture and a clear cataloguing, your watch valuation certificate also contains a current market value. As this value for various reasons may change over time, it is important to renew your valuation certificate regularly. We, and most insurance companies, recommend that you do this after two, maximum three years, or if something remarkable happens to the watch.

Lot 7. Patek Philippe — Complicated Watch

Lot 18. Omega — Speedmaster Apollo XI

On the 20 July at 20.17 UTC, the humans landed on the moon for the first time.

Four months later, in November the same year, a banquet was held in Houston, Texas to celebrate the achievement. There and then Omega presented their first limited edition Speedmaster, which was also made in gold. The first 32 watches were given to politicians and astronauts. Number 1 was given to the then President of the United States, Richard Nixon, and number 2 to Vice President Spiro Agnew. Those two watches were never received though because the value was considered too high. Number 1, the watch originally given to Nixon, can today be seen at the Omega Museum. 1014 samples were made out of this Omega Speedmaster between the years 1969-1973, and about 975 out of them could be bought by private individuals all over the world.

Lot 14. Rolex Submariner — “Serif Dial” Ref no. 5513

Lot 26. Patek Philippe — Calatrava

Patek Philippe was bought by the Stern family (who still owns the company) in 1932, the same year as the first Calatrava, Ref. 96, was released. This reference was in production for over 40 years (ca 1932-1973) which proves its success and popularity. It's inspired by the Bauhaus principle of form follows function and is meant to only show the time, but do it in the most attractive way possible.

The name Calatrava comes from the Calatrava Cross — the logo of Patek Philippe and Ref. 96 is considered by many as the blueprint for the ultimate dress watch. Lot 26 is a very fine sample in 18K pink gold from 1942 with a so called "Salmon Dial".

Lot 25. Rolex — Cosmograph Daytona

While the Rolex Daytona today is one of the most sought-after models in the Rolex catalogue, this was not the case when it was introduced in 1963. There are many anecdotes of Daytona watches sitting unsold in the display shelves, and when they finally sold, it was often with a hefty discount. This is a far cry from the current situation at the Rolex retailers, where demand greatly outweighs supply. In 1988 Rolex made a significant re-design of the Daytona, switching to an automatic chronograph movement (based on the Zenith El Primero and modified by Rolex), sapphire crystal and a more contemporary size and styling. This era also marks the start of the rising popularity of the model (both vintage and modern) and its status as an iconic watch.

Lot 25 is a “second generation” Daytona, originally sold in 1999, with a lovely white dial with tritium markers and hands (one of the last before the switch to luminova dials & hands). This auction also features third generation Daytonas (Lots 9, 58, 60), with the in-house movement, and a black dialed Ref. 116500 of the latest generation with a ceramic bezel (Lot 32).

25

Lot 47. Universal Genève — “Exotic Nina Rindt Blue”

Nina Rindt, model by profession and married to the Austrian Formula 1 driver Jochen Rindt, was regularly seen on the racing scene using a Universal Genève chronograph. Hers was a “Panda Dial” (white dial with black sub-dials), and that particular reference (885103/02) eventually got the nickname “Nina Rindt” among watch aficionados. Universal Genève also made similar versions with livelier color combinations, such as Lot no. 61 “Exotic Nina Rindt Blue”. Due to the rarity and overall great looks, today all versions are highly sought after on the collector market.

Lot 59. Longines Flyback — “Doppia Linguetta”

Lot 41. Lange & Söhne — Datograph Flyback “Philippe Dufour”

In the year 1999, just five years after Lange & Söhne re-started their production of watches, they presented a new flyback chronograph completely manufactured in house. Caliber L951.1 with its 405 parts quickly became legitimate in Haute Horology thanks to its design and finish.

Reference 403:031 was only produced between 2003-2005 and made in approximately 100 pieces. It's not a coincidence that legendary watchmaker Philippe Dufour is the owner of one of them, made in rose gold with a black and white dial; just like the one we can present at this auction. He has been seen wearing his watch at several official occasions as well as during many of his interviews, because of that this reference is now known as “The Dufourgraph”.

Lot 64. Patek Philippe — Nautilus Ref. 5711

The Patek Philippe Nautilus was designed by Gerald Genta and released in 1976. To celebrate the 30th anniversary in 2006, four new references were released, and out of them the most popular one was Ref. 5711. Probably because it is the one that looks the most like the original Nautilus, the Ref. 3700. Many people were surprised when Patek Philippe broke the news in early 2021 that Ref. 5711 was to be discontinued, but only months later was the new 5711/1A-014 released. Now with an olive-green dial instead of the classic dark blue. Lot 64 is a great sample of the 5711/1A-010, complete with box and certificate.

Kaplans Auktioner

Kaplans Auktioner is a family run business in its third generation. Kaplans Auktioner is the leading Swedish auction house for jewellery, silver, precious stones and watches. The auction house is situated on no 5 in the famous shopping street Biblioteksgatan in Stockholm, Sweden.

In addition to the weekly auctions throughout the year, Kaplans Auktioner also offers valuation service, a great selection of unique jewellery and watches in the shop, and also holds an inhouse goldsmith workshop. This gives Kaplans Auktioner a unique ability to offer customers tailor-made solutions at a very competitive price.

With more than 100,000 items for sale each year, Kaplans Auktioner reaches a large audience of buyers and sellers, both in Sweden and in the Nordic countries, as well as in the rest of the world.

Kaplans®
