Lot 57. Patek Philippe — “Tiffany Dial”

## Welcome to Important Watches, — this spring's main event for watch enthusiasts.

Today the wristwatch for many people mainly serves as a functional accessory, but back in the day it was an important tool for professions like pilots, divers, drivers and many others. Even if we today have other instruments to do the job, we still see that the tool watches many times are the ones that people show the most interest in. No matter if you are more into old vintage or newer watches, we have something that should interest everyone. Interestingly enough is that both our oldest and our newest watch are diver's watches. Which one speaks to you, Lot 56, an Omega Marine from 1938 or Lot 4, a Rolex Submariner so called Hulk with certificate from 2020?

A watch that has made us extra excited is Lot 24, a Longines chronograph from 1949. A well-kept flyback chronograph, reference 5415, with the well-known movement 13 ZN. This watch does not look like it has spent too many hours on a wrist and comes with Extract from the Archives.

There has been a lot of talk about the Patek Philippe Nautilus this season after the Ref. 5711 first being discontinued, and then after a few months, re-launched with a green dial. At this auction, we can offer as many as six different Patek Philippe Nautilus. For example, have a look at lot 57 with "Tiffany Dial", Lot 75 a Ref. 3700/1 s.c. "Jumbo" in steel and gold, and of course Lot 67, which is the much sought after Ref. 5711, complete with certificate from 2017.

The Omega Speedmaster is always a well-represented model at the Important Watches. This time we have eight of them, with a spread from classic references like the 105.012 from the 1960's, to two ones that are as new as from 2018. The most unique one though is Lot 14, the Omega Speedmaster s.c. "Ultraman". The Ultraman, with the famous movement 321 and striking orange chronograph hand, was only produced during 1968. This of course makes it very rare, but it is unknown how many that were originally made.

All watches at this auction have as usual been handpicked by us as the most interesting pieces we have seen this season. We are proud to present these 98 lots that we think combined builds one of our best auctions yet.

We wish both sellers and buyers an exciting Saturday!  
Kaplans Auktioner through

Georgios Batselas

Christian Blomberg

Michael Norberg

Tomas Keränen

# Buyer's Guide

All items at the auction are sold as seen. The buyer is therefore advised to carefully examine the condition of the lots before the auction. If Kaplans has made a serious error of judgement, stated any incorrect information, or if a so-called hidden defect exists, this may constitute a basis for cancelling the purchase. Complaints must be made within 10 days after the auction.

Our hammer auctions are physical auctions that are held at our premises at Biblioteksgatan 5 in Stockholm. You can bid online or bid in our auction room during these auctions. You may also submit absentee bids.

## Absentee bids

You may submit absentee bids for any item via Customer Services or our website until the time an auction starts. You indicate your maximum bid, which is the maximum amount you are willing to pay for a given lot. Customer Service then automatically bid on your behalf for this amount.

## Bid online

You can bid online during the auction. Simply log in with your customer number or registered email address and password. You submit your bid by clicking on the "Place bid" button. Your bid is made immediately and in accordance with our bidding intervals. All bids made at our auctions are binding. Kaplans Auktioner cannot guarantee that all bids are received at auction.

## Bidding in our auction hall

To bid in our auction hall during a hammer auction, you need an auction paddle that you obtain from Customer Services either prior to or during an auction. Your bid is binding until another bidder makes a higher bid. The buyer is the bidder who makes the last and highest bid when the auction hammer falls.

If two bidders make a bid of the same value, it is the auctioneer who determines which bid applies. The auctioneer also determines whether bidding should resume due to uncertainty surrounding the last bid.

Estimate prices are also quoted in Euro, where the exchange rate € 1 = SEK 10,10 is used in this catalogue. Amounts are rounded off up or down to the nearest ten. However, the final purchase price is set using the official exchange rate of the day of the auction. Purchased lots shall be paid in Swedish kronor. Purchased lots must be picked up and paid for within 5 business days from the auction date.

## Bidding increments

Bidding starts at the lowest bid and then follow these increments:

Increments SEK	Increase SEK
< 500	25
500 – 1 000	50
1 000 – 10 000	100
10 000 – 20 000	200
20 000 – 40 000	500
40 000 – 80 000	1 000
80 000 – 150 000	2 000
150 000 – 300 000	5 000
300 000 – 1 000 000	10 000
> 1 000 000	20 000

Bids are accepted within the bidding increments, however the auctioneer may deviate from these intervals.

## Buyer's premium

Kaplans Auktioner charges the buyer a premium of 20 %, VAT included. For each item purchased at auction we also charge a hammer fee of SEK 50 including VAT.

### Example

You make the winning bid for an item at SEK 10 000.  
The amount you pay is calculated in the following way:  
SEK 10 000 + SEK 2 000 + SEK 50 = SEK 12 050.

## Buyer's premium levels

If the price exceeds SEK 200 000, we use the following staircase:

Sales price up to SEK 200 000: 20 %

Sales price between SEK 200 000 – 500 000: 10 % on the excess

Sales price above SEK 500 000: 5 % on the excess

### Premium example:

You have won an item for SEK 750 000

200 000 x 20 % = SEK 40 000

300 000 x 10 % = SEK 30 000

250 000 x 5 % = SEK 12 500

Total buyer's premium = SEK 82 500

The hammer fee is SEK 50

Total amount: SEK 832 550

# Important Watches – at Kaplans Auktioner

## Selection

The idea of Important Watches is to create an auction which consists primarily of collectibles.

These watches may sometimes have a rather modest price, but somehow appeal to us because they are rare, unique and sometimes in mint condition. Some items may be restoration objects but can still be considered collectibles. We usually offer a couple of newer watches as well, in which case the watches are of more unusual models, with the associated certificate accompanied.

Boxes and certificates are available only when it is stated in the catalogue text.

All watches are sold as seen, both at the auction and in the store. All assessments of damage are subjective, as made by our experts. Buyers should carefully make their own assessment of the object.

The watches sold by Kaplans Auktioner are to be considered as art objects. This means that Kaplans Auktioner cannot guarantee the buyer that the watches work perfectly as timepieces.

Leather straps, gaskets and plastic crystals are considered service parts and may often be necessary to replace.

## Definitions, measurements and grading

“Not working” means that an overhaul of the watch at a watchmaker is necessary. It may concern a new battery, cleaning, new oil, and/or a repair.

“Defect” means that the watch is completely or partially damaged, and thus in a need of repair. It may also need new parts to get in good working condition.

Measurements described in the catalogue indicate the case’s outer dimensions, excluding crown and eventual push buttons.

All items are described with a grading system on a scale from one to ten, where ten is considered to be perfect. The categories that are graded are; movement (M), dial (D), case (C), bracelet (B). The expert’s opinion (EO) is our rating of the watch.

Example from a description of a watch: M 9, D 10, C 8, B 9, EO 9

## We recommend

When buying at an auction, you should expect some service or repair to be needed to get the watch in good condition. In some cases, such a repair and service may be costly. Please ask us before the auction.

Some watches need a battery replacement and all watches need new gaskets or a cleaning periodically.

We recommend an overhaul of the watch at a watchmaker’s at least every fifth to sixth years. For a watch to be waterproof, one should test it every one to two years.

For questions, contact us and we will do our best to help you.

## Tips and advice concerning your watch

Kaplans guarantees the authenticity of the watch and the accuracy of the cataloguing of the item you have purchased. All watches are sold as seen and therefore Kaplans is not responsible for the time accuracy of the watches. It is impossible to know where the current watch is in the service interval. If service documentation is not included you should expect the watch to be in need of an overhaul shortly.

## Service

All watches do have maintenance needs, and you should regularly submit your watch to a watchmaker for overhaul. The overhaul includes cleaning, oil change, new gaskets, etc.

Please note that watchmakers will perform an overhaul in different ways. It may sometimes be difficult to compare prices. We recommend you to always ask for a quote when you submit your watch. This way you know in advance what is to be done, at what cost, and an estimated delivery time.

A watch should get an overhaul at an interval of five to six years.

## Time Deviation

The quartz movement is generally resistant to shock and has a good precision. With a quartz movement you can expect a deviation of plus/minus maximum 10 seconds/month.

A mechanical watch (manual or automatic) has more parts and is therefore more sensitive to shocks. It is also influenced by temperature changes and movements, why you need to have a greater tolerance for differences in precision. With a mechanical watch you should expect a deviation of up to plus/minus 3–4 minutes/month.

## Waterproof

The waterproofing ability of a watch is expressed in the following instructions, often indicated on the watch dial:

30 m / 3 ATM / 3 bar

50 m / 5 ATM / 5 bar

100 m / 10 ATM / 10 bar

150 m / 15 ATM / 15 bar

200 m / 20 ATM / 20 bar

A watch is considered to be water resistant if it is marked 30 m. In practice, water resistant means that you may use it as an everyday watch, washing hands, washing dishes and wear it in slight rain.

If you want to be able to shower and swim with your watch, it must be resistant to at least 100 m.

To withstand diving and the stress this causes due to large pressure changes, the watch should at least be resistant to 200 m.

Note that the gaskets are to be seen as service parts and the watch must be maintained to retain its density. Kaplans recommends that you submit your watch to a watchmaker who works with the specific brand, to replace the gaskets and get the watch pressure tested every one to two years, or before a vacation by the seaside.

## Dial

All the objects are described with a grading system, including five categories that assess the condition from one to ten, where ten is considered to be perfect. One of the categories that are considered is the dial.

The damages assessed for a dial may for example include discoloration, moisture damage or some other kind of damage. It is rarely, if ever, that a damaged dial affects the function of the watch. This is a damage of a more cosmetic character.

## Leather Strap

We recommend our customers to buy a new leather strap, because the included strap on a used watch is often worn out. To take care of your newly purchased strap, wipe the band with a slightly damp, soft cloth after use.

## Bracelet

You can clean your watch bracelet yourself using a soft cloth or brush, soap and lukewarm water. However, it is very important to know that the watch is waterproof and has been tested recently so that it doesn't get damaged by moisture during the cleaning. In case of doubt, do not rinse the watch under water.

## Valuation certificate

We are happy to provide a written valuation certificate. Kaplans Auktionser's valuation certificates are recognized by all insurance companies and several of the appraisers who work at Kaplans Auktionser's Watch Department are "of the Swedish Chambers of Commerce appointed appraiser."

In addition to a picture and a clear cataloguing, your watch valuation certificate also contains a current market value. As this value for various reasons may change over time, it is important to renew your valuation certificate regularly. We, and most insurance companies, recommend that you do this after two, maximum three years, or if something remarkable happens to the watch.

Lot 2. Patek Philippe — Nautilus Ref. 3800

## Lot 14. Omega — Speedmaster s.c. “Ultraman”

In 1968, Omega produced a number of Speedmasters Ref. 145.012 with an orange chronograph hand. The reason, and exactly how many that was made, is still unknown. After being featured in Japanese television series “The Return of Ultraman” in 1971, the watch got its nickname “Speedmaster Ultraman”. Lot 14 comes with “Extract of the Archives”, confirming that it was produced with the orange chronograph hand.

13

## Lot 19. Rolex — Submariner “Lapis Lazuli Dial”

In the beginning of the 1990's, and for a few years only, it was possible to order a very special dial made of Lapis Lazuli for Rolex Submariners in either gold or steel/gold. It was a costly upgrade and not that many were sold. Exactly how many that were made is not known, but it is easy to understand that they are rare considering how uncommon they are at auctions around the world.

## Lot 24. Longines — Flyback Chronograph

This watch truly is something out of the ordinary, with the very interesting movement 13 ZN and in a condition that does not leave a lot to be desired. The reference 5415 is appealing to many people, with its 37 mm case and dial that still has a lot of Radium.

The production of the movement 13 ZN began in 1936 as one of the first ever flyback chronographs. The flyback complication makes it possible to reset and start the chronograph again with only one push, a great invention for the Longines line with focus on sports and aviation.

19  
SEK 730 000 | € 72 280

M 6 D 7 C 7 B 7 EO 8

ROLEX, Oyster Perpetual Date, Submariner (1000ft=300m, Swiss-T<25), Chronometer, "Lapis Lazuli Dial", Ref no. 16618, Serial no. ## Lot 22. Patek Philippe — World Time

The World Time complication as we know it today can be attributed to Louis Cottier (1894-1966) who solved the problem of displaying all 24 time zones in a legible way on the relatively small space of a watch dial, while simultaneously being able to read local time. Cottier worked with Patek Philippe (and other watch brands) to create various versions of World Timers starting in the 1930's and onwards into the 1960's. When Patek re-introduced the World Time in their catalogue in the year 2000 they retained the classical dial layout, but added a button that advances the hour and rotating discs one hour with each push, making time zone adjustments more convenient.

This particular piece, the reference 5230, is the third generation since the re-launch and among other design elements features a beautiful guilloché center dial, new shape of the hands and a reworked case style compared to the earlier versions.

## Lot 21. Lemania — “Nuclear Submarine”

Lemania produced watches for the Royal Navy for more than 40 years. Most of them single button chronographs with black dials and luminous paint (radium or later tritium) on dial and hands, since the watches needed to tell time even in the dark. This watch is an exception, having a light coloured dial with black hands and hour markers, and no luminous paint.

This model was given to the staff on board the Royal Navy's Nuclear Submarines. Nuclear submarines use a small nuclear reactor as their energy source, which enables them to stay under water for longer periods of time than conventional submarines, which are run by batteries charged by diesel powered generators. The submarines were equipped with extremely sensitive Geiger counters that easily could have given out false alarms if there had been Radium on the watches, therefore the lack of luminous paint.

## Lot 40. Vacheron Constantin — Overseas

This Vacheron Constantin watch belongs to the first generation of their Overseas range, launched in 1996. Intended as a luxury sports watch it combines a 150 m water resistance with an elegant slim profile due to the ultra-flat automatic movement, which interestingly utilizes a 21-carat gold inlay to make the self-winding action more efficient. Inspiration from the brand's logotype, the Maltese Cross, can be found in details throughout the watch design, most notably in the bezel shape, the case back and folding clasp. This particular piece has a dial that by age has turned into a warm cream coloured tone.

## Lot 52. Rolex — Explorer Ref. 1016

The Explorer with reference 1016 is one of the Rolex models that has been in production during the longest time. It was launched in 1963 and kept in production all the way until 1989. Many people appreciate the distinct black dial in contrast with the hour markers 3, 6 and 9 in bright tritium. This makes it a perfect tool watch — simple, robust and with a history of concurring Mount Everest.

# Kaplans Auktioner

Kaplans Auktioner is a family run business in its third generation. Kaplans Auktioner is the leading Swedish auction house for jewellery, silver, precious stones and watches. The auction house is situated on no 5 in the famous shopping street Biblioteksgatan in Stockholm, Sweden.

In addition to the weekly auctions throughout the year, Kaplans Auktioner also offers valuation service, a great selection of unique jewellery and watches in the shop, and also holds an inhouse goldsmith workshop. This gives Kaplans Auktioner a unique ability to offer customers tailor-made solutions at a very competitive price.

With more than 100,000 items for sale each year, Kaplans Auktioner reaches a large audience of buyers and sellers, both in Sweden and in the Nordic countries, as well as in the rest of the world.
