Lot 78. Cartier — Tank Cintrée, “100 Anniversary LTD 150 Ex”

Welcome to Important Watches — this spring’s main event for watch enthusiasts

2022 was a fantastic year for Kaplans Watch Department. We were able to produce two of our most interesting and successful Important Watches auctions until this day, and with that in mind we are now eager to present this season’s most interesting timepieces.

As often before, the catalogue is dominated by two popular brands: Rolex and Patek Philippe. A highlight from Rolex is of course Lot 39, a Rolex Cosmograph Daytona Ref. 6239 with a so-called “Tropical Dial”. But as always there is a wide range to everyone’s taste. Like Lot 16, a Submariner Ref. 1680 with red text, Lot 54, an 18K gold Day-Date with bark-finish or Lot 49, a Sea-Dweller Ref. 126660 previously owned by actor Mikael Persbrandt.

A favourite from the selection of Patek Philippe watches is Lot 86, an early Aquanaut Ref. 5060SJ in 18K gold. This was together with 5065 the first ever Aquanaut reference, launched in 1997. We are also thrilled to offer Lot 62, a Perpetual Calendar in 18K white gold with all the complications you can wish for, a wide range of classic Calatravas and Lots 17 and 64, two Neptunes with modern integrated bracelets.

Another brand we can see an increasing popularity in is of course Cartier. When smaller and dressier watches have gained interest on the market, these classic and sophisticated timepieces are more

popular than ever. If you like the later design from Cartier, have a look at Lot 78. A limited-edition Tank Cintrée in 18K gold, produced only in 150 pieces and complete with box and certificate from 2021. Other pieces worth mentioning are Lot 41, an early Pasha from 1988 and Lot 102, an 18K gold, diamond-set Trocadero.

With the rising interest in watches we are very proud to present more ladies’ watches than at any Important Watches auction before. For example, there is Lot 3, a Lady Royal Oak in 18K gold, Lot 34, a Vacheron Constantin from the 1940’s with Gay Frères bracelet and Lots 77 and 80: two vintage Piaget watches with that little something extra. And of course, a wide selection for the ladies from the popular brands already mentioned: Rolex, Patek Philippe and Cartier.

It is with great pride we present this catalogue with 107 handpicked lots.

We wish both buyers and sellers an exciting Saturday!

Buyer's Guide

All items at the auction are sold as seen. The buyer is therefore advised to carefully examine the condition of the lots before the auction. If Kaplans has made a serious error of judgement, stated any incorrect information, or if a so-called hidden defect exists, this may constitute a basis for cancelling the purchase. Complaints must be made within 10 days after the auction.

Our hammer auctions are physical auctions that are held at our premises at Biblioteksgatan 5 in Stockholm. You can bid online or bid in our auction room during these auctions. You may also submit absentee bids.

Absentee bids

You may submit absentee bids for any item via Customer Services or our website until the time an auction starts. You indicate your maximum bid, which is the maximum amount you are willing to pay for a given lot. Customer Service then automatically bid on your behalf for this amount.

Bid online

You can bid online during the auction. Simply log in with your customer number or registered email address and password. You submit your bid by clicking on the "Place bid" button. Your bid is made immediately and in accordance with our bidding intervals. All bids made at our auctions are binding. Kaplans Auktioner cannot guarantee that all bids are received at auction.

Bidding in our auction hall

To bid in our auction hall during a hammer auction, you need an auction paddle that you obtain from Customer Services either prior to or during an auction. Your bid is binding until another bidder makes a higher bid. The buyer is the bidder who makes the last and highest bid when the auction hammer falls.

If two bidders make a bid of the same value, it is the auctioneer who determines which bid applies. The auctioneer also determines whether bidding should resume due to uncertainty surrounding the last bid.

Estimate prices are also quoted in Euro, where the exchange rate € 1 = SEK 11.40 is used in this catalogue. Amounts are rounded off up or down to the nearest ten. However, the final purchase price is set using the official exchange rate of the day of the auction. Purchased lots shall be paid in Swedish kronor. Purchased lots must be picked up and paid for within 5 business days from the auction date.

Bidding increments

Bidding starts at the lowest bid and then follow these increments:

Increments SEK	Increase SEK
< 500	25
500 – 1 000	50
1 000 – 10 000	100
10 000 – 20 000	200
20 000 – 40 000	500
40 000 – 80 000	1 000
80 000 – 150 000	2 000
150 000 – 300 000	5 000
300 000 – 1 000 000	10 000
> 1 000 000	20 000

Bids are accepted within the bidding increments, however the auctioneer may deviate from these intervals.

Buyer's premium

Kaplans Auktioner charges the buyer a premium of 20%, VAT included. For each item purchased at auction we also charge a hammer fee of SEK 50 including VAT.

Example

You make the winning bid for an item at SEK 10 000. The amount you pay is calculated in the following way:
SEK 10 000 + SEK 2 000 + SEK 50 = SEK 12 050.

Buyer's premium levels

If the price exceeds SEK 200 000, we use the following staircase:
Sales price up to SEK 200 000: 20 %
Sales price between SEK 200 000 – 500 000: 10 % on the excess
Sales price above SEK 500 000: 5 % on the excess

Premium example:

You have won an item for SEK 750 000
 $200\,000 \times 20\% = \text{SEK } 40\,000$
 $300\,000 \times 10\% = \text{SEK } 30\,000$
 $250\,000 \times 5\% = \text{SEK } 12\,500$
 Total buyer's premium = SEK 82 500
 The hammer fee is SEK 50
 Total amount: SEK 832 500

Important Watches – at Kaplans Auktioner

Selection

The idea of Important Watches is to create an auction which consists primarily of collectibles.

These watches may sometimes have a rather modest price, but somehow appeal to us because they are rare, unique and sometimes in mint condition. Some items may be restoration objects but can still be considered collectibles. We usually offer a couple of newer watches as well, in which case the watches are of more unusual models, with the associated certificate accompanied.

Boxes and certificates are available only when it is stated in the catalogue text.

All watches are sold as seen, both at the auction and in the store. All assessments of damage are subjective, as made by our experts. Buyers should carefully make their own assessment of the object.

The watches sold by Kaplans Auktioner are to be considered as art objects. This means that Kaplans Auktioner cannot guarantee the buyer that the watches work perfectly as timepieces.

Leather straps, gaskets and plastic crystals are considered service parts and may often be necessary to replace.

Definitions, measurements and grading

“Not working” means that an overhaul of the watch at a watchmaker is necessary. It may concern a new battery, cleaning, new oil, and/or a repair.

“Defect” means that the watch is completely or partially damaged, and thus in a need of repair. It may also need new parts to get in good working condition.

Measurements described in the catalogue indicate the case’s outer dimensions, excluding crown and eventual push buttons.

All items are described with a grading system on a scale from one to ten, where ten is considered to be perfect. The categories that are graded are; movement (M), dial (D), case (C), bracelet (B). The expert’s opinion (EO) is our rating of the watch.

Example from a description of a watch: M 9, D 10, C 8, B 9, EO 9

We recommend

When buying at an auction, you should expect some service or repair to be needed to get the watch in good condition. In some cases, such a repair and service may be costly. Please ask us before the auction.

Some watches need a battery replacement and all watches need new gaskets or a cleaning periodically.

We recommend an overhaul of the watch at a watchmaker’s at least every fifth to sixth years. For a watch to be waterproof, one should test it every one to two years.

For questions, contact us and we will do our best to help you.

Tips and advice concerning your watch

Kaplans guarantees the authenticity of the watch and the accuracy of the cataloguing of the item you have purchased. All watches are sold as seen and therefore Kaplans is not responsible for the time accuracy of the watches. It is impossible to know where the current watch is in the service interval. If service documentation is not included you should expect the watch to be in need of an overhaul shortly.

Service

All watches do have maintenance needs, and you should regularly submit your watch to a watchmaker for overhaul. The overhaul includes cleaning, oil change, new gaskets, etc.

Please note that watchmakers will perform an overhaul in different ways. It may sometimes be difficult to compare prices. We recommend you to always ask for a quote when you submit your watch. This way you know in advance what is to be done, at what cost, and an estimated delivery time.

A watch should get an overhaul at an interval of five to six years.

Time Deviation

The quartz movement is generally resistant to shock and has a good precision. With a quartz movement you can expect a deviation of plus/minus maximum 10 seconds/month.

A mechanical watch (manual or automatic) has more parts and is therefore more sensitive to shocks. It is also influenced by temperature changes and movements, why you need to have a greater tolerance for differences in precision. With a mechanical watch you should expect a deviation of up to plus/minus 3–4 minutes/month.

Waterproof

The waterproofing ability of a watch is expressed in the following instructions, often indicated on the watch dial:

30 m / 3 ATM / 3 bar

50 m / 5 ATM / 5 bar

100 m / 10 ATM / 10 bar

150 m / 15 ATM / 15 bar

200 m / 20 ATM / 20 bar

A watch is considered to be water resistant if it is marked 30 m. In practice, water resistant means that you may use it as an everyday watch, washing hands, washing dishes and wear it in slight rain.

If you want to be able to shower and swim with your watch, it must be resistant to at least 100 m.

To withstand diving and the stress this causes due to large pressure changes, the watch should at least be resistant to 200 m.

Note that the gaskets are to be seen as service parts and the watch must be maintained to retain its density. Kaplans recommends that you submit your watch to a watchmaker who works with the specific brand, to replace the gaskets and get the watch pressure tested every one to two years, or before a vacation by the seaside.

Dial

All the objects are described with a grading system, including five categories that assess the condition from one to ten, where ten is considered to be perfect. One of the categories that are considered is the dial.

The damages assessed for a dial may for example include discoloration, moisture damage or some other kind of damage. It is rarely, if ever, that a damaged dial affects the function of the watch. This is a damage of a more cosmetic character.

Leather Strap

We recommend our customers to buy a new leather strap, because the included strap on a used watch is often worn out. To take care of your newly purchased strap, wipe the band with a slightly damp, soft cloth after use.

Bracelet

You can clean your watch bracelet yourself using a soft cloth or brush, soap and lukewarm water. However, it is very important to know that the watch is waterproof and has been tested recently so that it doesn't get damaged by moisture during the cleaning. In case of doubt, do not rinse the watch under water.

Valuation certificate

We are happy to provide a written valuation certificate. Kaplans Auktioner's valuation certificates are recognized by all insurance companies and several of the appraisers who work at Kaplans Auktioner's Watch Department are "of the Swedish Chambers of Commerce appointed appraiser."

In addition to a picture and a clear cataloguing, your watch valuation certificate also contains a current market value. As this value for various reasons may change over time, it is important to renew your valuation certificate regularly. We, and most insurance companies, recommend that you do this after two, maximum three years, or if something remarkable happens to the watch.

Lot 61. Rolex — Day-Date Ref. 18239

Lot 32. Rolex — Daytona “Mother-of-Pearl/Gold Crystals”-dial

Lot 6 and 46. Heuer — Monaco

The Heuer Monaco was introduced by the Swiss watchmaker Heuer in 1969. It is known for its distinctive square case and bold, modern design. The watch was designed by Jack Heuer, the great-grandson of the company's founder, and it was named after the famous Formula 1 Monaco Grand Prix.

The Heuer Monaco was one of the first watches to feature a self-winding chronograph movement, the Calibre 11, and shortly after Caliber 12 – which was developed in collaboration with Breitling, Hamilton-Buren, and Dubois Dépraz. The Calibre 11 was also the first automatic chronograph movement to be commercialized, making the Heuer Monaco a pioneering watch in the history of horology.

The original Heuer Monaco had a blue dial with white sub-dials, and it was famously worn by Steve McQueen in the 1971 movie “Le Mans.” McQueen’s association with the watch helped to make it an icon of 1960s and 1970s style, and it has remained popular with collectors and watch enthusiasts ever since.

Lot 14. Breguet — Type XX

The Breguet Type XX is a series of aviation-inspired chronograph watches produced by the Swiss watchmaker Breguet. The original Type XX was developed for the French military in the 1950s and was designed to meet the strict requirements of the French armed forces. The watch had to be reliable, accurate, and easy to read in low-light conditions, and the Type XX delivered on all counts.

In the 1990s, Breguet reintroduced the Type XX as a civilian watch, offering it in a range of materials and styles. The 1990s version of the Type XX features a stainless steel case with a diameter of 39 mm, and is powered by a self-winding Lemania Caliber 582 automatic movement. The watch has a chronograph function, with a flyback feature that allows the user to instantly reset and restart the stopwatch with a single push of a button.

The dial of the 1990s Type XX has the sought after Tritium indices and hands, which makes it stand out even more to the true collector as modern neo-vintage watch.

Lot 17 and 64. Patek Philippe — Neptune

Named after Neptune, the Roman god of the sea, this model by Patek Philippe was meant as a bridge between their sports and classic watches. Neptune was introduced back in 1996 and was in production until the mid-2000. Patek Philippe's tagline for marketing was "Ideal for sportswear, the supremely elegant Neptune is, at the same time, the perfect dress watch".

The Neptune has a screw-down crown and a fish scale inspired bracelet that makes it both sporty and elegant at the same time. At this auction we are happy to present two Neptunes in different sizes and materials.

Lot 37. Audemars Piguet — Royal Oak “Jumbo – Extra Thin”

Lot 39. Rolex — Cosmograph Daytona Ref. 6239

The Rolex Daytona, the brand's now very famous racing chronograph, was released in 1963 and therefor 2023 marks its 60th anniversary. The earliest models did not have Daytona on their dials though, the original inspiration actually came from the Le Mans 24-hour race. Daytona was added to the dials about a year after the production had started as Rolex was aiming at the US market, sponsoring the Daytona 24-hour race.

We have seen many variations of Daytonas through the years, but lot 39 is from the first reference ever produced – 6239. This piece is from circa 1966 and comes with a so called “Tropical Dial”, where the black sub-dials have turned into a, by many people much appreciated, brown shade.

Lot 54. Rolex — Day-Date s.c. “Bark Finish”

Lot 49. Rolex — Sea-Dweller “Mr. Mikael Persbrandt”

Mikael Persbrandt, born on the 25 September 1963 in Jakobsberg outside of Stockholm, is one of Sweden’s most famous actors. He began his career in the theatre in the early 1980’s and got his breakthrough in the Swedish series “Rederiet”. The character most people associate him with today though, is the outspoken police officer Gunvald Larsson from the film series “Beck”. Persbrandt has earned the Guldbagge award for “Best Actor” twice, and he played one of the leading roles in the movie “In a better world”, which gained an Oscar in 2010 for “Best Foreign Language Film”.

“This masterpiece of a watch has made it 6000 meters up in Himalaya, through racing at Circuit de Spa-Francorchamps and endless hours in the gym. But I wouldn’t recommend that you bring it 6000 meters down into the depth of the Mariana Trench, since it is only certified for 4000 m.” /Mikael Persbrandt

Lot 62. Patek Philippe — Perpetual Calendar Ref. 5270G

The combination of perpetual calendar and chronograph is, many would argue, the quintessential grand complication by Patek Philippe. There are more complicated watches for sure, but these watches have been and continues to be admired for their classic beauty. The reference 5270 was introduced in 2011 and is the first perpetual calendar chronograph with an entirely in-house made movement by Patek Philippe, since its inception in 1941.

Lot 62 is made in white gold with a silver dial and black hands and indices. The design choice of not adding a tachometer scale gives it a clean yet classic appearance. This particular dial design (5270G-001) was only available the first two years making it an interesting proposition for the watch collector.

Lot 63. Rolex — Sea-Dweller Ref. 1665

The Rolex Sea-Dweller Ref. 1665, first launched in 1967, was the first professional diver's watch ever released to the public. This was also the first time a helium escape valve appeared on a Rolex watch.

The main difference between the Sea-Dweller and Rolex previous diver's watch – the Submariner – was the improved water resistance. Lot 63 is a charming version of a 1665, s.c. "Great White-Mark I", from approximately 1978.

Kaplans Auktioner

Kaplans Auktioner is a family run business in its third generation. Kaplans Auktioner is the leading Swedish auction house for jewellery, silver, precious stones and watches. The auction house is situated on no 5 in the famous shopping street Biblioteksgatan in Stockholm, Sweden.

In addition to the weekly auctions throughout the year, Kaplans Auktioner also offers valuation service, a great selection of unique jewellery and watches in the shop, and also holds an inhouse goldsmith workshop. This gives Kaplans Auktioner a unique ability to offer customers tailor-made solutions at a very competitive price.

With more than 100,000 items for sale each year, Kaplans Auktioner reaches a large audience of buyers and sellers, both in Sweden and in the Nordic countries, as well as in the rest of the world.

Kaplans®
