Lot 80. Patek Philippe — Nautilus

# Welcome to Important Watches

## — this autumn's highlight for all watch enthusiasts

As the leaves turn and the days grow shorter, we invite you to explore a collection that captures the essence of timeless craftsmanship and elegance. This autumn's catalogue contains 118 lots, covering everything from antique pocket watches and vintage classics to modern innovations, offering both seasoned collectors and new enthusiasts the chance to acquire something extraordinary.

As always, there is a wide selection of Rolex watches. Whether you are looking for vintage or new, sporty or classic, there will surely be a watch that speaks to you. Apart from the popular steel sports watches, we can offer pieces in all precious metals, like Lot 3, a yellow gold Sky-Dweller; Lot 26, a Datejust in white gold; Lot 24, a Cellini in pink gold and Lot 59, a Day-Date in platinum. Not to forget, a piece that always commands attention, Lot 49, the King Midas with its very rare box.

From Patek Philippe, we have three different references of the very popular model Nautilus to offer: the neo-vintage Ref. 3800 (Lot 4); the immensely popular Ref. 5711 (Lot 63); and lastly, the superb Ref. 5980R in rose gold (Lot 80). Not to forget the outstanding Annual Calendar with Ref. 5205R (Lot 90), featuring complications like day, date, month, moon phase, and 24-hour indicator.

The last section we want to highlight is the many interesting vintage pieces. Too many to choose from, but a few favourites are Lot 58, an unusual and early Zenith El Primero in 18K gold; Lot 19, a Piaget ladies' watch with rhodonite dial, diamonds and rubies and Lot 91, an Omega from circa 1917 with the most unusual case shape.

In the spirit of autumn's transformation, this is an opportunity to add a piece to your collection that will stand the test of time. Each watch featured is more than just an instrument of time; it symbolizes precision, creativity and elegance. As you browse the catalogue, we hope you will feel the same excitement we did in selecting these pieces: the thrill of discovery, the appreciation for fine craftsmanship, and the joy of finding that perfect new addition to your collection.

We wish both sellers and buyers an exciting auction day.

Kaplans Auktioner through,

Georgios Batselas

Christian Blomberg

Michael Norberg

Sanna Gränesjö

Tomas Keränen

Daniel Staaf

# Buyer's Guide

All items at the auction are sold as seen. The buyer is therefore advised to carefully examine the condition of the lots before the auction. If Kaplans has made a serious error of judgement, stated any incorrect information, or if a so-called hidden defect exists, this may constitute a basis for cancelling the purchase. Complaints must be made within 10 days after the auction.

Our hammer auctions are physical auctions that are held at our premises at Biblioteksgatan 5 in Stockholm. You can bid online or bid in our auction room during these auctions. You may also submit absentee bids.

## Absentee bids

You may submit absentee bids for any item via Customer Services or our website until the time an auction starts. You indicate your maximum bid, which is the maximum amount you are willing to pay for a given lot. Customer Service then automatically bid on your behalf for this amount.

## Bid online

You can bid online during the auction. Simply log in with your customer number or registered email address and password. You submit your bid by clicking on the "Place bid" button. Your bid is made immediately and in accordance with our bidding intervals. All bids made at our auctions are binding. Kaplans Auktioner cannot guarantee that all bids are received at auction.

## Bidding in our auction hall

To bid in our auction hall during a hammer auction, you need an auction paddle that you obtain from Customer Services either prior to or during an auction. Your bid is binding until another bidder makes a higher bid. The buyer is the bidder who makes the last and highest bid when the auction hammer falls.

If two bidders make a bid of the same value, it is the auctioneer who determines which bid applies. The auctioneer also determines whether bidding should resume due to uncertainty surrounding the last bid.

Estimate prices are also quoted in Euro, where the exchange rate € 1 = SEK 11.40 is used in this catalogue. Amounts are rounded off up or down to the nearest ten. However, the final purchase price is set using the official exchange rate of the day of the auction. Purchased lots shall be paid in Swedish kronor. Purchased lots must be picked up and paid for within 5 business days from the auction date.

## Bidding increments

Bidding starts at the lowest bid and then follow these increments:

Increments SEK	Increase SEK
SEK 500	SEK 25
SEK 500 – 1 000	SEK 50
SEK 1 000 – 10 000	SEK 100
SEK 10 000 – 20 000	SEK 200
SEK 20 000 – 40 000	SEK 500
SEK 40 000 – 80 000	SEK 1 000
SEK 80 000 – 150 000	SEK 2 000
SEK 150 000 – 300 000	SEK 5 000
SEK 300 000 – 1 000 000	SEK 10 000
Above SEK 1 000 000	SEK 20 000

Bids are accepted within the bidding increments, however the auctioneer may deviate from these intervals.

## Buyer's premium

Kaplans Auktioner charges a buyer's premium of 20% on hammer prices up to SEK 1 000 000, VAT included. Value added tax is calculated only on Kaplans' sales commission and not on the hammer price. For each item purchased at auction we also charge a hammer fee of SEK 50 including VAT.

## Buyer's premium levels

If the hammer price exceeds SEK 1 000 000, we use the following levels: Hammer price up to SEK 1 000 000: 20% premium.

Hammer price between SEK 1 000 000 and SEK 5 000 000:

10% premium. Hammer price above SEK 5 000 000:

5 % on the exceeding part.

## Bidding example:

You have placed a winning bid of SEK 5 500 000 on an item.

Premium:

1 000 000 \* 20 % = SEK 200 000

4 000 000 \* 10 % = SEK 400 000

500 000 \* 5 % = SEK 25 000

Total buyer's premium = SEK 625 000.

The hammer fee is SEK 50.

Total amount: SEK 6 125 050.

# Important Watches – at Kaplans Auktioner

## Selection

The idea of Important Watches is to create an auction which consists primarily of collectibles.

These watches may sometimes have a rather modest price, but somehow appeal to us because they are rare, unique and sometimes in mint condition. Some items may be restoration objects but can still be considered collectibles. We usually offer a couple of newer watches as well, in which case the watches are of more unusual models, with the associated certificate accompanied.

Boxes and certificates are available only when it is stated in the catalogue text.

All watches are sold as seen, both at the auction and in the store. All assessments of damage are subjective, as made by our experts. Buyers should carefully make their own assessment of the object.

The watches sold by Kaplans Auktioner are to be considered as art objects. This means that Kaplans Auktioner cannot guarantee the buyer that the watches work perfectly as timepieces.

Leather straps, gaskets and plastic crystals are considered service parts and may often be necessary to replace.

## Definitions, measurements and grading

“Not working” means that an overhaul of the watch at a watchmaker is necessary. It may concern a new battery, cleaning, new oil, and/or a repair.

“Defect” means that the watch is completely or partially damaged, and thus in a need of repair. It may also need new parts to get in good working condition.

Measurements described in the catalogue indicate the case's outer dimensions, excluding crown and eventual push buttons.

All items are described with a grading system on a scale from one to ten, where ten is considered to be perfect. The categories that are graded are; movement (M), dial (D), case (C), bracelet (B). The expert's opinion (EO) is our rating of the watch.

Example from a description of a watch: M 9, D 10, C 8, B 9, EO 9

## We recommend

When buying at an auction, you should expect some service or repair to be needed to get the watch in good condition. In some cases, such a repair and service may be costly. Please ask us before the auction.

Some watches need a battery replacement and all watches need new gaskets or a cleaning periodically.

We recommend an overhaul of the watch at a watchmaker's at least every fifth to sixth years. For a watch to be waterproof, one should test it every one to two years.

For questions, contact us and we will do our best to help you.

Lot 63. Patek Philippe — Nautilus 5711

## Service

All watches do have maintenance needs, and you should regularly submit your watch to a watchmaker for overhaul. The overhaul includes cleaning, oil change, new gaskets, etc.

Please note that watchmakers will perform an overhaul in different ways. It may sometimes be difficult to compare prices. We recommend you to always ask for a quote when you submit your watch. This way you know in advance what is to be done, at what cost, and an estimated delivery time.

A watch should get an overhaul at an interval of five to six years.

## Time Deviation

The quartz movement is generally resistant to shock and has a good precision. With a quartz movement you can expect a deviation of plus/minus maximum 10 seconds/month.

A mechanical watch (manual or automatic) has more parts and is therefore more sensitive to shocks. It is also influenced by temperature changes and movements, why you need to have a greater tolerance for differences in precision. With a mechanical watch you should expect a deviation of up to plus/minus 3–4 minutes/month.

## Waterproof

The waterproofing ability of a watch is expressed in the following instructions, often indicated on the watch dial:

30 m / 3 ATM / 3 bar

50 m / 5 ATM / 5 bar

100 m / 10 ATM / 10 bar

150 m / 15 ATM / 15 bar

200 m / 20 ATM / 20 bar

A watch is considered to be water resistant if it is marked 30 m. In practice, water resistant means that you may use it as an everyday watch, washing hands, washing dishes and wear it in slight rain.

If you want to be able to shower and swim with your watch, it must be resistant to at least 100 m.

To withstand diving and the stress this causes due to large pressure changes, the watch should at least be resistant to 200 m.

Note that the gaskets are to be seen as service parts and the watch must be maintained to retain its density. Kaplans recommends that you submit your watch to a watchmaker who works with the specific brand, to replace the gaskets and get the watch pressure tested every one to two years, or before a vacation by the seaside.

## Dial

All the objects are described with a grading system, including five categories that assess the condition from one to ten, where ten is considered to be perfect. One of the categories that are considered is the dial.

The damages assessed for a dial may for example include discoloration, moisture damage or some other kind of damage. It is rarely, if ever, that a damaged dial affects the function of the watch. This is a damage of a more cosmetic character.

## Leather Strap

We recommend our customers to buy a new leather strap, because the included strap on a used watch is often worn out. To take care of your newly purchased strap, wipe the band with a slightly damp, soft cloth after use.

## Bracelet

You can clean your watch bracelet yourself using a soft cloth or brush, soap and lukewarm water. However, it is very important to know that the watch is waterproof and has been tested recently so that it doesn't get damaged by moisture during the cleaning. In case of doubt, do not rinse the watch under water.

## Valuation certificate

We are happy to provide a written valuation certificate. Kaplans Auktioner's valuation certificates are recognized by all insurance companies and several of the appraisers who work at Kaplans Auktioner's Watch Department are "of the Swedish Chambers of Commerce appointed appraiser."

In addition to a picture and a clear cataloguing, your watch valuation certificate also contains a current market value. As this value for various reasons may change over time, it is important to renew your valuation certificate regularly. We, and most insurance companies, recommend that you do this after two, maximum three years, or if something remarkable happens to the watch.

## Lot 4. Patek Philippe — Nautilus

The famous and well-known Patek Philippe Nautilus and the first reference 3700, came in 1976. Later, in 1981, Patek came up with reference 3800, almost the same as the original, but a bit smaller in size that could appeal to younger customers. The steel version was produced until 2006 and was later replaced by Ref. 5800 in 2008.

When in production, the 3800 was more expensive to buy than the 3700. The reason could be that the 3800 had a second hand, compared to the 3700 that didn't.

## Lot 37. Oris — Star

Oris was founded in 1904 in Hölstein, Switzerland and after only a few years in production they were the largest employer in the town, while also expanding to having more factories in other places. Their goal to keep growing and improving their quality came into a halt in 1934 when the Swiss government introduced the so-called “Watch Statue”. A law that was meant to regulate the industry and prevent brands from introducing new technology without permission. Oris was at this point still using pin-lever escapement movements which were claimed to be less accurate than the lever escapements that were already being used by many competitors.

Oris fought for many years to reverse the “Watch Statue”, and finally got the right to upgrade their movements in 1966. Later resulting in the release of the automatic dive watch Star, which contained their first lever escapement movement, caliber 645.

Limited and numbered (Nr.0149/1860).

## Lot 42. Chopard — L.U.C 1860

Chopard began developing their first in-house movement, caliber 1.96, in the early 1990's. The first 20 prototypes were finished in December 1995, and in 1997 it could finally be presented in their new model L.U.C. 1860.

The new movement received a lot of attention and was praised by watch enthusiasts worldwide, it later came to be acknowledged as one of the best movements manufactured in Switzerland. The movement was COSC certified and with Geneva Seal.

The first series of the L.U.C 1860 were divided in three different references, and then made in four different precious materials; yellow gold, rose gold, white gold and platinum. All of these were made in limited series and only between 1997–2002.

## Lot 47. Heuer — Carrera

Heuer produced chronographs, then as pocket watches, already in the early 1900's. By 1914 they released their first ever wrist chronograph, still in a time when wristwatches were not that common at all.

The first Heuer Carrera, Ref. 2447, was launched in 1963 and very shortly after came the similar Ref. 3647, now with two sub-dials instead of three. This gave more free space on the dial, making this a popular model for double signing or printing logos.

## Lot 49. Rolex — King Midas

When the Rolex model King Midas was launched in the early 1960's, it was both the heaviest and most expensive watch on the market. The name came from Greek mythology's King Midas, who according to the myth turned everything he touched with his left hand into gold. On the Rolex King Midas the crown is located on the left side of the watch, supposedly in honour of the myth.

It's believed that it was a young Gérald Genta that designed the King Midas and that the inspiration for the unusual case came from the Parthenon temple in Athens.

Lot 49 has Reference 4315 and is the third series of Midas, produced during about three years.

## Lot 57. Patek Philippe — 175 Anniversaire

Celebrating its 175th anniversary in 2014, Patek Philippe released a limited edition chronograph.

What makes this watch interesting from a collector perspective is that, unlike conventional chronographs, this piece is purely dedicated to making calculations by use of the three scales (pulsimeter, tachymeter, and telemeter) displayed on the watch dial. Logically, sub dials for elapsed time and running seconds are omitted. As such it is quite unique compared to the regular production chronographs of the brand. The three scales dominate the dial with the gold indices moved closer to the centre. This in combination with the exquisitely stepped lugs and rectangular chronograph pushers all form part of the vintage aesthetic. As an additional note to the collector, this limited edition watch comes with a folding clasp marked with the anniversary and a special design wooden box.

## Lot 58. Zenith — El Primero

In the late 1960's Zenith raced against other manufacturers to get the first automatic chronograph movement to the market. They created the El Primero which means "the first" in Spanish. It is debatable which brand was actually first, but everything happened months apart in 1969.

The most popular El primero at the time was made of steel, but between 1969 and 1972 they made a gold version, the reference G381. It was only produced in 700 pieces which makes it the rarest El Primero model from the day.

## Lot 69. Omega — Speedmaster “Misprint Bezel 220”

The Omega Speedmaster with the 220 misprint bezel is an interesting piece of horological history. The misprint involves the tachymeter scale on the bezel, where the number 220 appears instead of 200. This particular error occurred in a small batch of Speedmaster bezels produced in late 1970.

## Lot 76. Rolex — Datejust “Wooden Dial”

Rolex Datejust 16013 is a classic model known for its two-tone design, combining stainless steel and gold. Our example of the reference 16013 has a wooden dial, which is very rarely found in this type of watch. These dials are crafted from high-quality wood, making each one unique due to the natural grain patterns.

## Lot 90. Patek Philippe — Annual Calendar

Patek Philippe's Annual Calendar Reference 5205, featuring day/date/month apertures in an arc, debuted in 2010 with two white gold versions. In 2022, it was updated with a new contemporary colour. The case, known for its concave bezel, hollowed flanks, and skeletonised lugs, is meticulously hand-polished by the manufacture's artisans. Our example is the 5205R-011, full set, dated April 2023.

# Kaplans Auktioner

Kaplans Auktioner is a family run business in its third generation. Kaplans Auktioner is the leading Swedish auction house for jewellery, silver, precious stones and watches. The auction house is situated on no 5 in the famous shopping street Biblioteksgatan in Stockholm, Sweden.

In addition to the weekly auctions throughout the year, Kaplans Auktioner also offers valuation service, a great selection of unique jewellery and watches in the shop, and also holds an inhouse goldsmith workshop. This gives Kaplans Auktioner a unique ability to offer customers tailor-made solutions at a very competitive price.

With more than 100,000 items for sale each year, Kaplans Auktioner reaches a large audience of buyers and sellers, both in Sweden and in the Nordic countries, as well as in the rest of the world.
