IMPORTANT WATCHES

Autumn 2020

Saturday 14 November 13.00

For the latest information regarding display times
and more information on each lot number, please visit

www.kaplans.se

Lot 20. Breitling — “Kronometer Stockholm, 765 AVI”

Lot 119. In 2020 Breitling released a re-edition of the 765 AVI. The final lot of the auction is a steel Breitling 765 AVI re-edition, sold by Breitling themselves and all proceedings will be donated for charity. The amount from the proceedings will be donated to Sweden’s largest private charity Operakällaren Foundation.

Welcome to Important Watches, Autumn 2020

May and November are always special months for us at the watch department, they usually mean a couple of busy weeks. But it's also just in the weeks before the Important Watches takes place, that we get to see and get a grip of the full picture of the auction and the work we have put in during the last six months. We are always thrilled to present our auction, filled with hand-picked favourites and collectibles, and this time is no different. Within the 119 lots there should be something for everyone, and we are honoured to be trusted with the task of finding them their new owners.

People's interest in watches just seem to keep increasing, and with all the information available today so is the knowledge. What used to be a practical or a trendy accessory has now grown into a full-time hobby. We really enjoy meeting both our regulars and newer customers daily and see how the trends are changing and what everyone wants at the moment.

This might be the most excited we have been about our Rolex selection in a long time. No matter if you are a vintage collector or more interested in the newer so-called modern classics, we have a watch for you. If you prefer the older versions, do not miss Lot 37; an 18K gold Datejust with gilt dial, Lot 45; an underline Submariner from 1963 or Lot 113; a GMT-Master so-called "Pussy Galore" with a tropical gilt dial.

If you are more into newer sports watches instead, we can offer watches like the Hulk, Kermit and Batman (Lots 58,59 and 72), or why not a Daytona reference 116500LN with box and certificate from 2018 (Lot 118). There is as many as 40 Rolex watches at this auction – are you able to choose a favourite?

A watch that has made us extra enthusiastic is Lot 20, a double signed Breitling "Kronometer Stockholm, 765 AVT". A rare pilots chronograph with a design that feels classic yet modern. To our great pleasure, Breitling themselves has chosen to sell a re-edition of that same model at the auction and donate all proceedings to Operakällaren Foundation. We would like to direct a big thank you to Breitling Sweden for trusting us with this great assignment. Check out our last item of the auction, Lot 119, and read more about it on page 39.

The whole watch team is immensely proud to present this auction, full of unique, exclusive and interesting pieces. We hope you will find it just as exciting as we do.

Georgios Batselas

Tomas Keränen

Buyer's Guide

All items at the auction are sold as seen. The buyer is therefore advised to carefully examine the condition of the lots before the auction. If Kaplans has made a serious error of judgement, stated any incorrect information, or if a so-called hidden defect exists, this may constitute a basis for cancelling the purchase. Complaints must be made within 10 days after the auction.

Our hammer auctions are physical auctions that are held at our premises at Biblioteksgatan 5 in Stockholm. You can bid online or bid in our auction room during these auctions. You may also submit absentee bids.

Absentee bids

You may submit absentee bids for any item via Customer Services or our website until the time an auction starts. You indicate your maximum bid, which is the maximum amount you are willing to pay for a given lot. Customer Service then automatically bid on your behalf for this amount.

Bid online

You can bid online during the auction. Simply log in with your customer number or registered email address and password. You submit your bid by clicking on the "Place bid" button. Your bid is made immediately and in accordance with our bidding intervals. All bids made at our auctions are binding. Kaplans Auktioner cannot guarantee that all bids are received at auction.

Bidding in our auction hall

To bid in our auction hall during a hammer auction, you need an auction paddle that you obtain from Customer Services either prior to or during an auction. Your bid is binding until another bidder makes a higher bid. The buyer is the bidder who makes the last and highest bid when the auction hammer falls.

If two bidders make a bid of the same value, it is the auctioneer who determines which bid applies. The auctioneer also determines whether bidding should resume due to uncertainty surrounding the last bid.

Estimate prices are also quoted in Euro, where the exchange rate € 1 = SEK 10 is used in this catalogue. Amounts are rounded off up or down to the nearest ten. However, the final purchase price is set using the official exchange rate of the day of the auction. Purchased lots shall be paid in Swedish kronor. Purchased lots must be picked up and paid for within 5 business days from the auction date.

Bidding increments

Bidding starts at the lowest bid and then follow these increments:

Increments SEK	Increase SEK
< 500	25
500 – 1 000	50
1 000 – 10 000	100
10 000 – 20 000	200
20 000 – 40 000	500
40 000 – 80 000	1 000
80 000 – 150 000	2 000
150 000 – 300 000	5 000
300 000 – 1 000 000	10 000
> 1 000 000	20 000

Bids are accepted within the bidding increments, however the auctioneer may deviate from these intervals.

Buyer's premium

Kaplans Auktioner charges the buyer a premium of 20 %, VAT included. For each item purchased at auction we also charge a hammer fee of SEK 50 including VAT.

Example

You make the winning bid for an item at SEK 10 000.
The amount you pay is calculated in the following way:
SEK 10 000 + SEK 2 000 + SEK 50 = SEK 12 050.

Buyer's premium levels

If the price exceeds SEK 200 000, we use the following staircase:
Sales price up to SEK 200 000: 20 %
Sales price between SEK 200 000 – 500 000: 10 % on the excess
Sales price above SEK 500 000: 5 % on the excess

Premium example:

You have won an item for SEK 750 000
 $200\,000 \times 20\% = \text{SEK } 40\,000$
 $300\,000 \times 10\% = \text{SEK } 30\,000$
 $250\,000 \times 5\% = \text{SEK } 12\,500$
 Total buyer's premium = SEK 82 500
 The hammer fee is SEK 50
 Total amount: SEK 832 550

Important Watches – at Kaplans Auktioner

Selection

The idea of Important Watches is to create an auction which consists primarily of collectibles.

These watches may sometimes have a rather modest price, but somehow appeal to us because they are rare, unique and sometimes in mint condition. Some items may be restoration objects but can still be considered collectibles. We usually offer a couple of newer watches as well, in which case the watches are of more unusual models, with the associated certificate accompanied.

Boxes and certificates are available only when it is stated in the catalogue text.

All watches are sold as seen, both at the auction and in the store. All assessments of damage are subjective, as made by our experts. Buyers should carefully make their own assessment of the object.

The watches sold by Kaplans Auktioner are to be considered as art objects. This means that Kaplans Auktioner cannot guarantee the buyer that the watches work perfectly as timepieces.

Leather straps, gaskets and plastic crystals are considered service parts and may often be necessary to replace.

Definitions, measurements and grading

“Not working” means that an overhaul of the watch at a watchmaker is necessary. It may concern a new battery, cleaning, new oil, and/or a repair.

“Defect” means that the watch is completely or partially damaged, and thus in a need of repair. It may also need new parts to get in good working condition.

Measurements described in the catalogue indicate the case’s outer dimensions, excluding crown and eventual push buttons.

All items are described with a grading system on a scale from one to ten, where ten is considered to be perfect. The categories that are graded are; movement (M), dial (D), case (C), bracelet (B). The expert’s opinion (EO) is our rating of the watch.

Example from a description of a watch: M 9, D 10, C 8, B 9, EO 9

We recommend

When buying at an auction, you should expect some service or repair to be needed to get the watch in good condition. In some cases, such a repair and service may be costly. Please ask us before the auction.

Some watches need a battery replacement and all watches need new gaskets or a cleaning periodically.

We recommend an overhaul of the watch at a watchmaker’s at least every fifth to sixth years. For a watch to be waterproof, one should test it every one to two years.

For questions, contact us and we will do our best to help you.

Tips and advice concerning your watch

Kaplans guarantees the authenticity of the watch and the accuracy of the cataloguing of the item you have purchased. All watches are sold as seen and therefore Kaplans is not responsible for the time accuracy of the watches. It is impossible to know where the current watch is in the service interval. If service documentation is not included you should expect the watch to be in need of an overhaul shortly.

Service

All watches do have maintenance needs, and you should regularly submit your watch to a watchmaker for overhaul. The overhaul includes cleaning, oil change, new gaskets, etc.

Please note that watchmakers will perform an overhaul in different ways. It may sometimes be difficult to compare prices. We recommend you to always ask for a quote when you submit your watch. This way you know in advance what is to be done, at what cost, and an estimated delivery time.

A watch should get an overhaul at an interval of five to six years.

Time Deviation

The quartz movement is generally resistant to shock and has a good precision. With a quartz movement you can expect a deviation of plus/minus maximum 10 seconds/month.

A mechanical watch (manual or automatic) has more parts and is therefore more sensitive to shocks. It is also influenced by temperature changes and movements, why you need to have a greater tolerance for differences in precision. With a mechanical watch you should expect a deviation of up to plus/minus 3–4 minutes/month.

Waterproof

The waterproofing ability of a watch is expressed in the following instructions, often indicated on the watch dial:

30 m / 3 ATM / 3 bar

50 m / 5 ATM / 5 bar

100 m / 10 ATM / 10 bar

150 m / 15 ATM / 15 bar

200 m / 20 ATM / 20 bar

A watch is considered to be water resistant if it is marked 30 m. In practice, water resistant means that you may use it as an everyday watch, washing hands, washing dishes and wear it in slight rain.

If you want to be able to shower and swim with your watch, it must be resistant to at least 100 m.

To withstand diving and the stress this causes due to large pressure changes, the watch should at least be resistant to 200 m.

Note that the gaskets are to be seen as service parts and the watch must be maintained to retain its density. Kaplans recommends that you submit your watch to a watchmaker who works with the specific brand, to replace the gaskets and get the watch pressure tested every one to two years, or before a vacation by the seaside.

Dial

All the objects are described with a grading system, including five categories that assess the condition from one to ten, where ten is considered to be perfect. One of the categories that are considered is the dial.

The damages assessed for a dial may for example include discoloration, moisture damage or some other kind of damage. It is rarely, if ever, that a damaged dial affects the function of the watch. This is a damage of a more cosmetic character.

Leather Strap

We recommend our customers to buy a new leather strap, because the included strap on a used watch is often worn out. To take care of your newly purchased strap, wipe the band with a slightly damp, soft cloth after use.

Bracelet

You can clean your watch bracelet yourself using a soft cloth or brush, soap and lukewarm water. However, it is very important to know that the watch is waterproof and has been tested recently so that it doesn't get damaged by moisture during the cleaning. In case of doubt, do not rinse the watch under water.

Valuation certificate

We are happy to provide a written valuation certificate. Kaplans Auktionser's valuation certificates are recognized by all insurance companies and several of the appraisers who work at Kaplans Auktionser's Watch Department are "of the Swedish Chambers of Commerce appointed appraiser."

In addition to a picture and a clear cataloguing, your watch valuation certificate also contains a current market value. As this value for various reasons may change over time, it is important to renew your valuation certificate regularly. We, and most insurance companies, recommend that you do this after two, maximum three years, or if something remarkable happens to the watch.

Lot 20. Breitling — 765 AVI “Double Signed”

In 1953 Breitling launched their new chronograph 765 AVI, where AVI was short for Aviation, since the model was meant to be mainly for pilots. A couple of years later, around 1960, was the first time the model was double signed with Kronometer Stockholm – a company founded in Stockholm, Sweden in 1933 and that sold watches for both civilian and industrial use. They did not produce any watches themselves but was the general agent in Sweden for several brands, including Breitling.

In 2020 Breitling released a re-edition of the 765 AVI. The new version is made in a limited edition in three varieties: 18K gold, platinum and steel. The final lot of the auction is a steel Breitling 765 AVI re-edition, sold by Breitling themselves and all proceedings will be donated for charity.

Lot 40. Eterna-Matic — KonTiki

In 1947, Norwegian explorer Thor Heyerdahl and his crew set out on a 101 days long adventure to cross the Pacific Ocean on a balsawood raft called KonTiki. The journey went from Peru to Polynesia with the goal to prove a point that the inhabitants of the Polynesian atoll originally descended from Peru.

To be able to track time and tides, all members of the crew was wearing an Eterna watch. Eleven years later, in 1958, Eterna celebrated the explorer with the launch of their new model KonTiki, which shows the famous raft on its back case.

Lot 50. Omega — Speedmaster “Calibre 321”

The Omega Speedmaster, designed for racing but made famous by travelling to the moon, might be one of the most well-known chronographs and the early versions are run by a very recognised movement; calibre 321. The movement, that was developed in cooperation with Lemania, was produced with extremely high precision and was so well-made that it was possible to only replace certain parts instead of restoring the whole movement. This was very rare at the time.

Lot 59,49,1,45,58.

Lot 53. Seiko — “62MAS”

The Seiko “62MAS” is considered to be Seiko’s first attempt at creating a dedicated dive watch. Released in 1965 Seiko was quite late to jump on the bandwagon compared to Swiss manufacturers such as Rolex (the Submariner was released back in 1953). The “62MAS” featured 150 meters of water resistance, a diving bezel and was also equipped with a quick set date. With its “Skin Diver type” case design and fetching grey “Sunburst Dial” with large indices, it has become ever more sought after in the vintage watch market due to its classical yet distinctive looks. The popularity of the “62MAS” has also resulted in Seiko bringing a number of re-editions to market, inspired by the original design. The most recent example was released earlier this year; the reference SLA037J1, commemorating the 55th anniversary of the introduction of the “62MAS” in 1965.

This model was launched in 1932 as the first diving-watch.

Lot 47. Rolex Explorer — “Blackout”

When Rolex introduced the Explorer Reference 14270 at the Basel fair in 1989, it featured significant updates in the appearance of the dial. The matte dial and painted indices of the earlier Explorer Reference 1016 was replaced with a more contemporary gloss finish with applied indices. The first batches of the 14270 that hit the market had the cut-out centre of the 3, 6 and 9 numerals filled with black, a design choice that was soon changed by Rolex to a white centre filling. As the first version of the dial is uncommon it has become sought after by collectors and, as is customary in the vintage watch world, earned its own nickname – the “Blackout” dial.

Kaplans Auktioner

Kaplans Auktioner is a family run business in its third generation. Kaplans Auktioner is the leading Swedish auction house for jewellery, silver, precious stones and watches. The auction house is situated on no 5 in the famous shopping street Biblioteksgatan in Stockholm, Sweden.

In addition to the weekly auctions throughout the year, Kaplans Auktioner also offers valuation service, a great selection of unique jewellery and watches in the shop, and also holds an inhouse goldsmith workshop. This gives Kaplans Auktioner a unique ability to offer customers tailor-made solutions at a very competitive price.

With more than 100,000 items for sale each year, Kaplans Auktioner reaches a large audience of buyers and sellers, both in Sweden and in the Nordic countries, as well as in the rest of the world.

Kaplans®
