Lot 3. Patek Philippe — Nautilus, 5711

## Welcome to Important Watches — Spring 2022

Sunshine, butterflies, and blossoming trees are all great signs of an approaching spring. But here at Kaplans watch department our favourite sign is when we get to launch the first lots from our spring version of Important Watches. This selection has had us excited for months now and we are eager to finally present one of our most interesting auctions yet.

It is not only the spring trees that are turning green outside. The last few years the colour has become exceptionally popular in the world of watches with most brands now displaying and highlighting a model with a green dial in their collection. At this auction you can find a great selection of Rolex watches with green dials. Have a look at Lot 13, a Daytona with “Bright Green Dial”, Lot 82, a Day-Date with “Olive Green Dial” and the three different green Submariners that are Lots 1, 15 and 83, more known as “Starbucks”, “Hulk” and “Kermit”.

While on the subject of Rolex, we would also like to mention our broad selection of Daytonas. If you are a member of team Two-Tone, Lot 49 with Ref. 116523 is the watch for you. For the collector interested in Neo-vintage we can recommend Lot 88, Ref. 16520 from 1998 with “Tritinova Dial” or if gold is your material, we suggest you look at Lot. 92, Ref. 116528 in 18K gold from 2002.

In our job we have the opportunity to see a wide variety of watches in every aspect from style to price point and age. We think it is really interesting that the age span between the oldest and the newest wristwatch at this auction is over 100 years. Lot 61 is a beautiful tonneau shaped Patek Philippe in 14K gold sold in 1919 whereas Lot 86 is a Rolex Daytona in steel with certificate from December 2021. Two very appealing watches that could not be more different from each other.

Talking about this auction, we must also mention our wide range of Patek Philippe watches. Among others we can offer as many as six different versions of the popular Nautilus, a Ref. 3970 Perpetual Calendar (Lot 77) and a platinum chronograph with diamond dial from 2019 (Lot 96).

It is obvious we are very proud of this auction. We believe all 104 lots have something special about them and are immensely grateful for both new and reoccurring customers choosing to sell through us. We wish you all, both buyers and sellers, an exciting Saturday.

Kaplans through,

Georgios Batselas

Christian Blomberg

Michael Norberg

Sanna Gränesjö

Tomas Keränen

# Buyer's Guide

All items at the auction are sold as seen. The buyer is therefore advised to carefully examine the condition of the lots before the auction. If Kaplans has made a serious error of judgement, stated any incorrect information, or if a so-called hidden defect exists, this may constitute a basis for cancelling the purchase. Complaints must be made within 10 days after the auction.

Our hammer auctions are physical auctions that are held at our premises at Biblioteksgatan 5 in Stockholm. You can bid online or bid in our auction room during these auctions. You may also submit absentee bids.

## Absentee bids

You may submit absentee bids for any item via Customer Services or our website until the time an auction starts. You indicate your maximum bid, which is the maximum amount you are willing to pay for a given lot. Customer Service then automatically bid on your behalf for this amount.

## Bid online

You can bid online during the auction. Simply log in with your customer number or registered email address and password. You submit your bid by clicking on the "Place bid" button. Your bid is made immediately and in accordance with our bidding intervals. All bids made at our auctions are binding. Kaplans Auktioner cannot guarantee that all bids are received at auction.

## Bidding in our auction hall

To bid in our auction hall during a hammer auction, you need an auction paddle that you obtain from Customer Services either prior to or during an auction. Your bid is binding until another bidder makes a higher bid. The buyer is the bidder who makes the last and highest bid when the auction hammer falls.

If two bidders make a bid of the same value, it is the auctioneer who determines which bid applies. The auctioneer also determines whether bidding should resume due to uncertainty surrounding the last bid.

Estimate prices are also quoted in Euro, where the exchange rate € 1 = SEK 10,30 is used in this catalogue. Amounts are rounded off up or down to the nearest ten. However, the final purchase price is set using the official exchange rate of the day of the auction. Purchased lots shall be paid in Swedish kronor. Purchased lots must be picked up and paid for within 5 business days from the auction date.

## Bidding increments

Bidding starts at the lowest bid and then follow these increments:

Increments SEK	Increase SEK
< 500	25
500 – 1 000	50
1 000 – 10 000	100
10 000 – 20 000	200
20 000 – 40 000	500
40 000 – 80 000	1 000
80 000 – 150 000	2 000
150 000 – 300 000	5 000
300 000 – 1 000 000	10 000
> 1 000 000	20 000

Bids are accepted within the bidding increments, however the auctioneer may deviate from these intervals.

## Buyer's premium

Kaplans Auktioner charges the buyer a premium of 20 %, VAT included. For each item purchased at auction we also charge a hammer fee of SEK 50 including VAT.

### Example

You make the winning bid for an item at SEK 10 000.

The amount you pay is calculated in the following way:  
SEK 10 000 + SEK 2 000 + SEK 50 = SEK 12 050.

## Buyer's premium levels

If the price exceeds SEK 200 000, we use the following staircase:

Sales price up to SEK 200 000: 20 %

Sales price between SEK 200 000 – 500 000: 10 % on the excess

Sales price above SEK 500 000: 5 % on the excess

### Premium example:

You have won an item for SEK 750 000

200 000 x 20 % = SEK 40 000

300 000 x 10 % = SEK 30 000

250 000 x 5 % = SEK 12 500

Total buyer's premium = SEK 82 500

The hammer fee is SEK 50

Total amount: SEK 832 550

# Important Watches – at Kaplans Auktioner

## Selection

The idea of Important Watches is to create an auction which consists primarily of collectibles.

These watches may sometimes have a rather modest price, but somehow appeal to us because they are rare, unique and sometimes in mint condition. Some items may be restoration objects but can still be considered collectibles. We usually offer a couple of newer watches as well, in which case the watches are of more unusual models, with the associated certificate accompanied.

Boxes and certificates are available only when it is stated in the catalogue text.

All watches are sold as seen, both at the auction and in the store. All assessments of damage are subjective, as made by our experts. Buyers should carefully make their own assessment of the object.

The watches sold by Kaplans Auktioner are to be considered as art objects. This means that Kaplans Auktioner cannot guarantee the buyer that the watches work perfectly as timepieces.

Leather straps, gaskets and plastic crystals are considered service parts and may often be necessary to replace.

## Definitions, measurements and grading

“Not working” means that an overhaul of the watch at a watchmaker is necessary. It may concern a new battery, cleaning, new oil, and/or a repair.

“Defect” means that the watch is completely or partially damaged, and thus in a need of repair. It may also need new parts to get in good working condition.

Measurements described in the catalogue indicate the case’s outer dimensions, excluding crown and eventual push buttons.

All items are described with a grading system on a scale from one to ten, where ten is considered to be perfect. The categories that are graded are; movement (M), dial (D), case (C), bracelet (B). The expert’s opinion (EO) is our rating of the watch.

Example from a description of a watch: M 9, D 10, C 8, B 9, EO 9

## We recommend

When buying at an auction, you should expect some service or repair to be needed to get the watch in good condition. In some cases, such a repair and service may be costly. Please ask us before the auction.

Some watches need a battery replacement and all watches need new gaskets or a cleaning periodically.

We recommend an overhaul of the watch at a watchmaker’s at least every fifth to sixth years. For a watch to be waterproof, one should test it every one to two years.

For questions, contact us and we will do our best to help you.

## Tips and advice concerning your watch

Kaplans guarantees the authenticity of the watch and the accuracy of the cataloguing of the item you have purchased. All watches are sold as seen and therefore Kaplans is not responsible for the time accuracy of the watches. It is impossible to know where the current watch is in the service interval. If service documentation is not included you should expect the watch to be in need of an overhaul shortly.

## Service

All watches do have maintenance needs, and you should regularly submit your watch to a watchmaker for overhaul. The overhaul includes cleaning, oil change, new gaskets, etc.

Please note that watchmakers will perform an overhaul in different ways. It may sometimes be difficult to compare prices. We recommend you to always ask for a quote when you submit your watch. This way you know in advance what is to be done, at what cost, and an estimated delivery time.

A watch should get an overhaul at an interval of five to six years.

## Time Deviation

The quartz movement is generally resistant to shock and has a good precision. With a quartz movement you can expect a deviation of plus/minus maximum 10 seconds/month.

A mechanical watch (manual or automatic) has more parts and is therefore more sensitive to shocks. It is also influenced by temperature changes and movements, why you need to have a greater tolerance for differences in precision. With a mechanical watch you should expect a deviation of up to plus/minus 3–4 minutes/month.

## Waterproof

The waterproofing ability of a watch is expressed in the following instructions, often indicated on the watch dial:

30 m / 3 ATM / 3 bar

50 m / 5 ATM / 5 bar

100 m / 10 ATM / 10 bar

150 m / 15 ATM / 15 bar

200 m / 20 ATM / 20 bar

A watch is considered to be water resistant if it is marked 30 m. In practice, water resistant means that you may use it as an everyday watch, washing hands, washing dishes and wear it in slight rain.

If you want to be able to shower and swim with your watch, it must be resistant to at least 100 m.

To withstand diving and the stress this causes due to large pressure changes, the watch should at least be resistant to 200 m.

Note that the gaskets are to be seen as service parts and the watch must be maintained to retain its density. Kaplans recommends that you submit your watch to a watchmaker who works with the specific brand, to replace the gaskets and get the watch pressure tested every one to two years, or before a vacation by the seaside.

## Dial

All the objects are described with a grading system, including five categories that assess the condition from one to ten, where ten is considered to be perfect. One of the categories that are considered is the dial.

The damages assessed for a dial may for example include discoloration, moisture damage or some other kind of damage. It is rarely, if ever, that a damaged dial affects the function of the watch. This is a damage of a more cosmetic character.

## Leather Strap

We recommend our customers to buy a new leather strap, because the included strap on a used watch is often worn out. To take care of your newly purchased strap, wipe the band with a slightly damp, soft cloth after use.

## Bracelet

You can clean your watch bracelet yourself using a soft cloth or brush, soap and lukewarm water. However, it is very important to know that the watch is waterproof and has been tested recently so that it doesn't get damaged by moisture during the cleaning. In case of doubt, do not rinse the watch under water.

## Valuation certificate

We are happy to provide a written valuation certificate. Kaplans Auktionser's valuation certificates are recognized by all insurance companies and several of the appraisers who work at Kaplans Auktionser's Watch Department are "of the Swedish Chambers of Commerce appointed appraiser."

In addition to a picture and a clear cataloguing, your watch valuation certificate also contains a current market value. As this value for various reasons may change over time, it is important to renew your valuation certificate regularly. We, and most insurance companies, recommend that you do this after two, maximum three years, or if something remarkable happens to the watch.

## Lot 4. Rolex — Submariner “Tiffany & Co Signed”

Why a second brand on a Rolex dial? In the history of Rolex watches it was actually not that uncommon from the 1960's and on for a 30-year long period to have double-signed or co-branded dials. To find a Tiffany signed dial is a rather rare thing today though, and adds to the existing value of a special model, like the one we can present at this auction – a Submariner Ref. 1680 from the late 1970's. Since the beginning of the 1990's Rolex decided to stop co-branded dials being made by other manufacturers though because they wanted to control all the manufacturing themselves. The high level of quality control that they have today compared to the past, makes watches like this even more special and collectable.

## Lot 11. Universal Genève — “Evil Nina Rindt”

Nina Rindt, Finnish born professional model, married the race car driver Jochen Rindt in 1967. During the 1960's she was part of the Formula 1 scene until her husband's tragic and fatal accident during a practice session for the 1970 Italian Grand Prix. Around the racetracks Nina was often seen wearing a Universal Genève Compax wristwatch, with a white dial and black chronograph sub-dials. The 36-millimeter watch was, at the time, considered large and sporty for a woman to wear. It has become increasingly popular among watch collectors due to its attractive design and Universal's heritage as makers of quality chronographs. The model was produced with a number of different dial variations. The white dialed version earned the nickname “Nina Rindt” and the version with the inverted color scheme (ref. 885103/01) through association got the name “Evil Nina Rindt”.

## Lot 22. Daniel Roth — Master Chronograph

Daniel Roth, one of his generations most talented watchmakers, started his own brand in 1989 after working for renowned brands like Audemars Piguet and Breguet. He was then one of the first independent watch makers to produce watches in his own name. His watches are recognised by their distinct design, like this Masters Chronograph with double-ellipse case, striped dial and arrow hands.

## Lot 25. Patek Philippe — Nautilus Travel Time Chronograph

In 2014, Patek Philippe launched a new Nautilus, the Ref. 5990 / 1A Travel Time Chronograph. This features complications like date (at 12 o'clock), chronograph (60 minutes), two time zones, and day and night indicator. We have previously seen all these functions from Patek Philippe, but not in this form – the new caliber CH 28-520 C FUS was born. To make this happen it was needed to redesign the case slightly, still not compromising its recognizable shape. The model was discontinued earlier this year.

## Lot 28. Omega — Speedmaster “Apollo XI 20th Anniversary, German Market”

Omega released three different steel versions of the Speedmaster in 1989 to celebrate the 20th anniversary of the moon landing. In total, 6250 watches were made. A numbered and limited edition, delivered “head only”, made in 250 pieces for the German market, a numbered and limited edition of 2000 pieces for the American market, and another 4000 pieces worldwide that was limited but not numbered. These watches are identical with the standard Speedmaster “Moon Watch” from this time, except for an engraving on the case side. The German version says “xxx/250 Apollo XI 1969–1989” whereas the other versions says either “Apollo XI 1969”, “xxxx/2000 Apollo XI 1969” or “xxxx/2000”.

## Lot 88 and 75. Rolex — “Tritinova Dial”

In the late 1990's the watch industry decided to replace the lume on their dials from radioactive Tritium to the non-radioactive Luminova. Rolex was no exception, but some dials had already been manufactured with “SWISS-T<25” on them (the “T” meaning Tritium), and were waiting to get lumed. When the transition began in 1998 all those Tritium-dials got Luminova instead. Today that special mix is rather rare and only exist on a few watches and models. The collectors named those dials “Tritinova”, and of course that adds special rareness that collectors appreciate. At this auction we have two Rolex watches with “Tritinova Dial”, Lot 75 an Explorer II Ref. 16570 and Lot 88, a steel Daytona Ref. 16520.

## Lot 77. Patek Philippe — Perpetual Calendar

Reference 3970 is considered the heir to the legendary and very sought after 2499. This timepiece is a perfect example of Patek Philippe's watchmaking skill, combining a perpetual calendar with a chronograph function. Launched in 1986, 3970 was 1,5 mm smaller than its predecessor but featured two more complications; leap year and 24-hours indication. It was also equipped with a new movement; the CH 27-70 Q, based on Lemania 2310 (though heavily modified) just as the very popular Omega 321. This was the first time Patek Philippe used a non-Valjoux-based chronograph movement. The 3970 has been quite underestimated in comparison to other references but is an unbelievably well-balanced watch that wears perfect on the wrist. A classic that will never go out of style.
